SECTION I TONY KNOWLES COASTAL TRAIL GUIDING PRINCIPLES

Anchorage airport master plan update

Coastal trail appendix

The Tony Knowles Coastal Trail (Coastal Trail) is a highly used and important community resource in Anchorage. During the Ted Stevens Anchorage International Airport (Airport) Master Plan Update (Master Plan Update) process, many comments were made on the need to protect and maintain the trail. These draft Tony Knowles Coastal Trail Guiding Principles have been developed for future use in context with the Master Plan Update. The Airport recognizes that should future Airport development impact the trail, mitigations and improvements should be considered in light of these guiding principles. Trail continuity is essential to meet community desires.

Guiding principles for future consideration:

1. Accommodate the full range of Coastal Trail users and maximize free-flow operations (i.e., minimize conflicting driveways, roads, crossings, etc.).
2. Continue to function as a stand-alone trail (not principally associated with a road or other right-of-way) and consider trail access during construction.
3. Minimize impacts to the natural resources, environment, and ambiance of the trail.
4. Minimize impacts to the existing viewsheds and accessibility to those viewsheds.
5. Provide access for trail users to the trail's surrounding natural environments.
6. Provide access and crossings for wildlife within and near the trail corridor.
7. Provide connections to other existing and planned trails.
8. Emphasize safety between trail users and wildlife, intersecting trails, access roads, and adjacent and nearby land uses.
9. Minimize long stretches that are highly exposed to prevailing winds.
10. Consider opportunities to enhance and diversify the trail experience.

Crepe Myrtle Trail

APRIL 28, 2014 / 0 COMMENTS / BICYCLE NEWS, BICYCLE PATHS, BICYCLEMOBILE.ORG
ISSUES, BICYCLING, UNCATEGORIZED

In the mid 90's a plan was proposed to create a bicycle trail connecting downtown to the mouth of Dog River. That plan never materialized. Recently [Mobile United's](#) Natural Resources Committee has made the trail a project priority for the upcoming years.

*Proposed Route of
Crepe Myrtle Trail*

Features of the Trail

- Connect four city parks: Arlington Park, Doyle Park, McNally Park, and Helen Wood Park.
- Create safe bicycle access to downtown from DIP neighborhoods.
- Provide access to undeveloped areas of the western coast of Mobile Bay
- Promote activity in heavily populated areas with few safe bicycle routes

[Crepe Myrtle Trail Route](#) (PDF)

Obstacles To Trail Creation

- Funding (Possible Funding from Restore Act)
- Coordinating with USA Foundation and their Brookley By The Bay initiative for easement and access through their property.
- Mobile Airport Authority and FAA approval for a trail on the eastern edge of the runway.

Key proponents of the trail include Mobile County Health Department, Mobile United, Alabama Coastal Foundation, Mobile Baykeepers, Team Share the Road, and more.

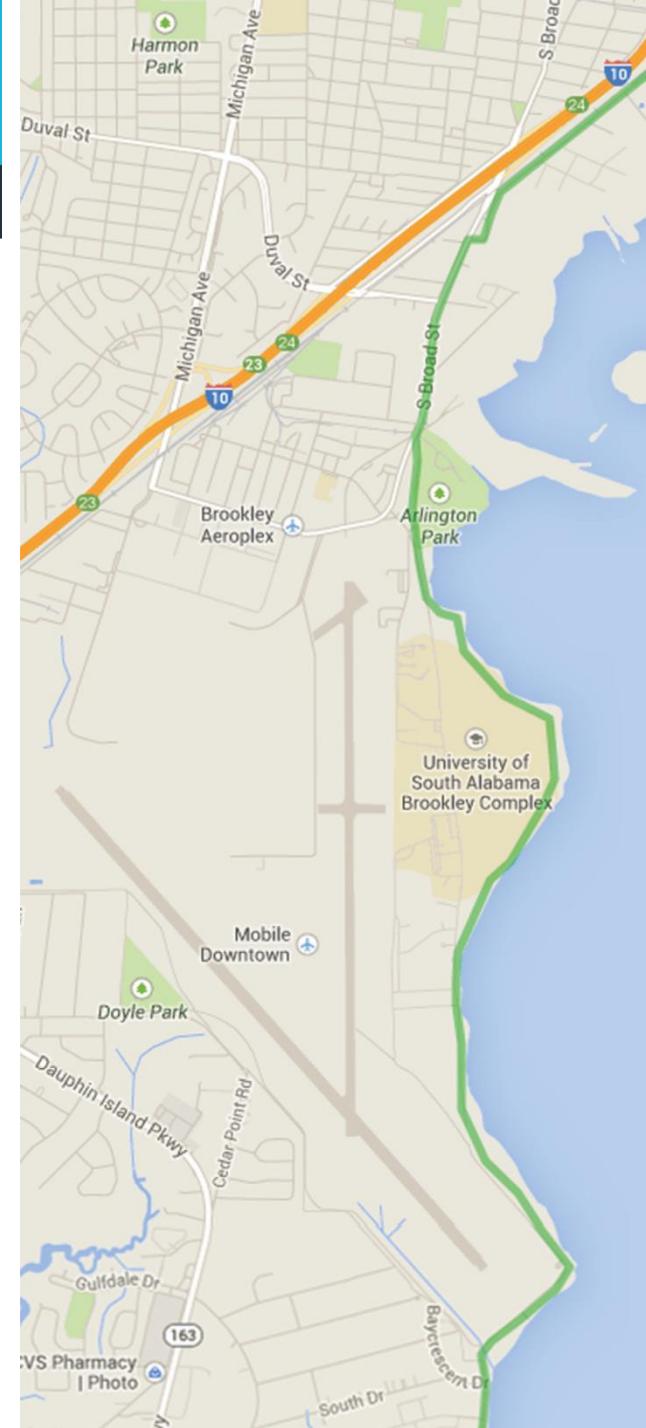

News about the Crepe Myrtle Trail

2014 Crepe Myrtle Trail Ride - June 21 - 8:30am

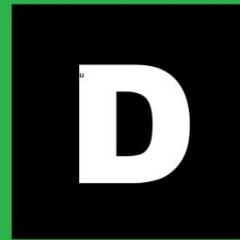

Featuring:

- Historic opportunity to bike ride the east side of Mobile Aeroplex at Brookley (on the water side of the runway)
- Educational talks about bird habitat, Mobile-Tensaw Delta Estuary, and environmental restoration
