Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type: Military Cleanup Site
Status: Open - Remediation
Status Date: 02/18/2010
Lead Agency: CENTRAL COAST RWQCB (REGION 3)
Caseworker: SMS
Local Agency: DEPARTMENT OF TOXIC SUBSTANCES CONTROL
RB Case Number: 16622 -- 108
LOC Case Number: 200040 -- 108
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Not reported
EDR Link ID: DOD100220600
Potential Contaminants of Concern: Not reported
Site History: Operable Unit 1 (OU1) is the Fritzsche Army Airfield Fire Drill Area site. It originally consisted of a groundwater plume (primarily TCE) and some source area soil contamination (primarily TCE). The soil contamination has been successfully remediated, leaving only the groundwater plume. Since identification of an off-site (outside the former Ft. Ord boundaries) portion of the groundwater plume in 2005, this plume is typically defined as consisting of two parts: the on-site and off-site portions.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type: Litigation Support
Completed Date: 01/05/2008
Comments: Not reported

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: YORK SCHOOL
Completed Document Type: Consent Order
Completed Date: 02/08/2001
Comments: ORDER - YORK -- Signed enforceable agreement with York School for Operation and Maintenance (OM) of the remedy which was performed by the Army. The OM includes fencing, education, construction support, provisions for landuse restrictions upon Deed transfer and reporting.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 12/05/2007
Comments: This document outlines a set of environmental restrictions placed on parcels within the Former Fort Ord, California. The parcel within this land use covenant is S4.1.1, approximately 72 acres and the transferee is Caltrans. Earlier remedial investigations identified contaminate plumes in the groundwater underlying the Former Fort Ord. Currently the plumes are undergoing remediation and this covenant places restrictions on the use of groundwater wells and any other activity on the property that interferes with or adversely affects the groundwater remediation systems on the property. Intended reuse for this parcel includes, development, housing, street right-of-way, and offices. Parcel has been transferred to the recipient (Cal Trans).
Not reported

Completed Area Name: Transfer Parcels
Completed Sub Area Name: California State University Monterey Bay
Completed Document Type: Environmental Assessment
Completed Date: 05/19/2008
Comments: DTSC comment letter issues addressed.

Completed Area Name: Munitions Response Sites Track 0
Completed Sub Area Name: GW2
Completed Document Type: Land Use Restriction
Completed Date: 09/22/2003
Comments: Some of the transferred Track 0 parcels overlie groundwater contaminated with volatile organic compounds, primarily Trichloroethene (TCE) associated with Operable Unit 2 (landfill) and Remedial Investigations Sites 2 and 12. The groundwater is undergoing extraction and treatment. This land use covenant restricts the drilling in to and use of groundwater, as well as protects the groundwater monitoring, extraction and treatment system.

Completed Area Name: Munitions Response Sites Track 0
Completed Sub Area Name: GW1
Completed Document Type: Land Use Restriction
Completed Date: 09/17/2003
Comments: DEED - T0GW1 -- A portion of Ordinance and Explosives Track 0 parcels at Former Fort Ord overlie groundwater contaminated with Volatile organic compounds, primarily Trichloroethene (TCE) associated with Operable Unit 2 (landfill) and Remedial Investigations Sites 2 and 12. The groundwater is undergoing extraction and treatment. The Land

Use Covenant is part of the FOST package. Use of groundwater is restricted.

Completed Area Name: MRS - Del Rey Oaks
Completed Sub Area Name: MRS-15DRO.1
Completed Document Type: Land Use Restriction
Completed Date: 12/28/2005
Comments: This Land Use Covenant for the parcels transferred to the City of Del Rey Oaks, was recorded on December 28, 2005. The property, approximately 324 acres, was approved for early transfer by the Governor for use as a resort hotel and golf course. The LUC prohibits residential and other sensitive uses and requires DTSC approval prior to soil disturbance, except as allowed pursuant to the DTSC's agreement with Del Rey Oaks and the Del Rey Oaks Excavation Ordinance, which regulates digging in areas suspected of containing munitions and explosives of concern.

acres. Earlier remedial investigations identified contaminate plumes in the groundwater underlying the former Fort Ord. Currently the plumes are undergoing remediation and this covenant places restrictions on the use of groundwater within these parcels. Some prohibited activities described within this covenant include the construction of groundwater wells and any other activity on the property that interferes with or adversely affects the groundwater remediation systems on the property. Intended reuse for these parcels includes, development, housing, street right-of-way, and offices.

Completed Area Name: MAIN GARRISON
Completed Sub Area Name: GW COVENANT 1
Completed Document Type: Land Use Restriction
Completed Date: 05/22/2002
Comments: DEED - MGGW1 -- A portion of Former Fort Ord at the Main Garrison and housing areas overlie groundwater contaminated with Volatile organic compounds, primarily Trichloroethene (TCE) associated with Operable Unit 2 (landfill) and Remedial Investigations Site 2 and 12. The groundwater is undergoing extraction and treatment. Use of groundwater is restricted. The LUC is part of the early transfer package approved by the Governor.

Completed Area Name: Munitions Response Sites Track 0
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 06/26/2006
Comments: This land use covenant restricts the use of underlying contaminated groundwater on Track 0 parcels E4.6.2 and E8.1.2.2, totaling approximately 102 acres. Earlier remedial investigations identified contaminate plumes in the underlying groundwater. Currently the plumes are undergoing remediation and this covenant places restrictions on the use of groundwater within these parcels. Prohibited activities include the construction of groundwater wells and any other activity on the property that interferes with or adversely affects the groundwater remediation systems on the property. This LUC allows reuse of the parcels while the groundwater is cleaned up. The County of Monterey Planning Department was notified of this Land Use Covenant on July 20, 2006.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 06/09/2009
Comments: A Land Use Covenant was recorded prohibiting use of this portion to construct homes, schools, day care facilities, and hospitals, on approximately 128 acres, due to the potential for methane off-gas to penetrate the buildings' interiors and expose occupants to significant levels of methane. In addition to sensitive uses being prohibited, prior to any construction on the property, compliance with specific requirements must be demonstrated.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Early Transfer/Covenant Deferral Package
Completed Date: 07/21/2008
Comments: Governor signed concurrence letter on 7/21/2008.

Comments: A CRUP will be signed by the Army and DTSC, restricting residential, schools, and child care facilities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 07/10/2009
Comments: This document outlines a set of environmental restrictions placed on parcels within the Former Fort Ord, California. The parcel within this land use covenant is L2.2.2, approximately 4.545 acres and the transferee is the Monterey-Salinas Transit. Earlier remedial investigations identified contaminate plumes in the groundwater underlying the Former Fort Ord. Currently the plumes are undergoing remediation and this covenant places restrictions on the use of groundwater wells and any other activity on the property that interferes with or adversely affects the groundwater remediation systems on the property. Intended reuse for this parcel includes a park and ride facility.

Comments: Not reported

Completed Area Name: Munitions Response Sites Track 2
Completed Sub Area Name: BLM Area B
Completed Document Type: Technical Report
Completed Date: 09/13/2018
Comments: The Technical Memorandum evaluates and presents a review of the surface munitions and explosives of concern (MEC) removal results as well as the digital geophysical mapping (DGM) data. The document states surface MEC removal and DGM are complete within Unit B-3E-NE and recommends no additional subsurface MEC removal beyond specifically identified trails. No changes were made to the memorandum based on the response to comments so the July 2018 original report is accepted as the final report.

Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 09/30/2016
Comments: DTSC accepted the draft version of the MRS-BLM Units 25/31 Prescribed Burn Plan without further comment. The remedy for the Impact Area includes prescribed burns to remove vegetation prior to removing munitions and explosives of concern.

Completed Area Name: Munitions Response Sites Track 3
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 05/03/2017
Comments: The Units 25 and 31 Site Specific Workplan describes surface Munitions and Explosives of Concern (MEC) removal and digital geophysical mapping (DGM) that will be conducted in accordance with the Track 3 Remedial Design/Remedial Action Workplan (2009). Extremely steep terrain in the eastern portion of Unit 25 will preclude completion of surface MEC removal and DGM survey; and dense stands of oak trees may preclude completion of DGM survey. Subsurface removal is not currently planned but the process of identifying subsurface removal areas is described.

Completed Document Type: Record of Decision
Completed Date: 03/15/1994
Comments: RAP-INTRM - An Interim Action Record of Decision was approved on 03/15/94 for contaminated surface soil remediation. The ROD addresses immediate, imminent, and/or significant risks to human health and the environment posed by limited areas of shallow contaminated surface soils. The selected remedy involves; site eligibility screening; biological and ecological assessment; regulatory approval process; public notice; excavation of limited quantities of shallow contaminated surface soil; confirmation sampling and backfilling with clean fill; soil treatment, recycling, and/or disposal. Soil treatment/recycling will be performed at the Fort Ord Soil Treatment Area using biotreatment and/or soil vapor extraction. Approximate cost = \$24 million; Funding = BRAC.

Completed Area Name: OU Carbon Tetrachloride Plume
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 11/10/2009
Comments: This Implementation Remedial Action Work Plan (RIAWP) describes the remedial actions to be conducted to implement the Record of Decision, Operable Unit Carbon Tetrachloride Plume (OUCTP). The RIAWP discusses the site characteristics, plume character, the regulatory framework and general construction requirements, groundwater monitoring and closure requirements. Separate appendices are included in the document to present detailed remedial designs (RDs) for each of the three aquifers. Appendix A, "Operable Unit Carbon Tetrachloride Plume, A-Aquifer Design," is included in the initial distribution of this RIAWP. The remaining two RDs will be issued at a later date and approved separately.

Completed Area Name: HOUSING AND FORMER GARRISON PARCELS
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability for Early Transfer
Completed Date: 12/03/2001
Comments: FOSET - HOUS -- Based upon DTSC's recommendation, the Governor concurred on the Finding of Suitability to Early Transfer (FOSET) for the Housing and former Garrison parcels. The Property, comprised of approximately 758 acres, is identified for future residential and mixed uses. A land use covenant was signed by the Army, DTSC and Regional Water Quality Control Board to restrict groundwater pumping due to contaminated groundwater underlying property.

Completed Area Name: RANGES 43-48, OE-16, RANGE 30A
Completed Sub Area Name: Not reported
Completed Document Type: *Action Memorandum (if <\$1M)
Completed Date: 06/28/2002
Comments: RA - 43-48 -- The Action Memorandum documents the basis for conducting a time-critical removal action. It is to mitigate the imminent threat to human health, welfare and the environment posed by the presence of ordnance and explosives/unexploded ordnances at Range 43-48 on the former Fort Ord. The Time Critical Removal Action consisted of conducting surface removals for accessible areas of the site in order to locate and remove ordnance and explosives/unexploded ordnance.

Completed Area Name: PARKER FLATS
Completed Sub Area Name: Not reported
Completed Document Type: *Action Memorandum (if <\$1M)
Completed Date: 06/28/2002
Comments: RA - PF -- The Action Memorandum documents the basis for conducting a time-critical removal action. It is to mitigate the imminent threat

Completed Area Name: Munitions Response Sites Track 1
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision
Completed Date: 03/30/2005
Comments: Regional Water Quality Control Board signed on April 4, 2005. US Environmental Protection Agency signed on April 6, 2005.

Completed Area Name: Munitions Response Sites Track 2
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 09/08/2006
Comments: RI/FS completed. Resolution of LUC ARAR issue. Discussions with EPA and DTSC will require residential restrictions on all sites. Army will Sign LUC.

Completed Area Name: Munitions Response Sites Track 2
Completed Sub Area Name: Not reported
Completed Document Type: Proposed Plan
Completed Date: 02/26/2007
Comments: DTSC had no further comments.

Completed Area Name: Munitions Response Sites Track 2
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision
Completed Date: 07/25/2008
Comments: DTSC signed ROD on 7/21. This ROD selects institutional controls (state land use covenant) as the remedy for this former MEC use area. The institutional controls include MEC recognition and safety training for anyone conducting intrusive work; construction monitoring of intrusive work; and restrictions against residential use, unless specific procedures are completed. The implementation and management costs over a 30 year period are estimated at \$258,000. The Army has performed a MEC removal action on the approximately 756 acres. The MEC removal was conducted on all or portions of 14 Munitions Response Sites.

Completed Area Name: Munitions Response Sites Track 0
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision
Completed Date: 06/28/2005
Comments: This Track 0 ROD "Plug-in" approval memo for Group B determined that 41 sites, totalling approximately 220 acres, require no further action because they contain no evidence of Munitions and Explosives of Concern (MEC) and these areas have never been used for MEC related activities of any kind.

Completed Area Name: Munitions Response Sites Track 0
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision
Completed Date: 06/27/2005
Comments: This Track 0 ROD "Plug-in" approval memo for Group C determined that 24 sites, totalling approximately 683 acres, contain no evidence of Munitions and Explosives of Concern (MEC) and these areas have never

S101272787

been used for MEC related activities of any kind. Regarding MEC, the sites are suitable for unrestricted use.

Completed Area Name: Munitions Response Sites Track 3
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 09/21/2007
Comments: DTSC determined the Closure Plan for removal of Munitions and Explosives of Concern (MEC) on Range 36A (Solid Waste Management Unit FTO-016) to be technically complete.

Completed Area Name: Munitions Response Sites Track 3
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 06/27/2007
Comments: Draft Final changes incorporated in Final document without additional comments from DTSC.

Completed Area Name: OU Carbon Tetrachloride Plume
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 08/17/2006
Comments: DTSC conditionally approved the Final Operable Unit Carbon Tetrachloride Plume (OUCTP) RI/FS. The recommended groundwater remedial alternative is reductive dechlorination using lactate for the A-Aquifer, pump and treat for the Upper 180-Foot Aquifer and monitored natural attenuation with an option for wellhead treatment for the Lower 180-foot aquifer. The approval condition requires additional data collection during the remedial design and implementation phases. The text of Volumes 1-5 has been uploaded to Envirostor. The entire document can be downloaded at <http://www.fortordcleanup.com/adminrec/ar%5Fpdfs/AR%2DOUCTP%2D0011P>

Completed Area Name: RI SITES
Completed Sub Area Name: Site 39
Completed Document Type: Risk Assessment Report
Completed Date: 12/06/2007
Comments: Document was finalized. DTSC comments were addressed; no comments from DFG on final.

Completed Area Name: RI SITES
Completed Sub Area Name: Site 39
Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 01/09/2010
Comments: This Remedial Design (RD)/Remedial Action Work Plan (RAWP) presents details regarding the remediation at Site 39 Inland Ranges and the vertical expansion at Area E, Operable Unit 2 (OU2) Landfills at the former Fort Ord, Monterey County, California. This RD/RAWP describes the general methods and procedures for the remedial action at Site 39 Inland Ranges and the final design of the vertical expansion at Area E. The remedial action includes the following activities: (1) Excavation of contaminated soil from historical areas (HAs) located within the habitat area of the Site 39 Inland Ranges. (2) Transport and placement of excavated soil on top of the existing geomembrane at Area E as a vertical expansion. (3) Construction of a new, engineered cover composed of a foundation layer, geomembrane, and vegetative layer.

Completed Document Type: Pilot Study/Treatability Workplan
Completed Date: 07/22/2005
Comments: DTSC reviewed draft final. No further comments on draft final.

Completed Area Name: SITE 2/12
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 07/26/2006
Comments: Agencies concurred in BCT meeting that revisions to this 2004 annual report will be made in next annual 2005 submittal.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Memorandum of Agreement - IAG
Completed Date: 01/04/2007
Comments: The Final AOC was signed by EPA and DTSC on January 4, 2007 for the Early Transfer. Public comment period was announced in Federal Register. The Early Transfer process allows, under CERCLA, the transfer of property prior to completion of all remedial actions. The Early Transfer requires approval from the EPA Administrator and Gubernatorial concurrence. This significant milestone allows for the potential reuse of 3,484 acres of the former military facility.

Comments: No Comments.

Completed Area Name: RANGES 43-48, OE-16, RANGE 30A
Completed Sub Area Name: Not reported
Completed Document Type: Site Summary Report
Completed Date: 07/18/2006
Comments: DTSC has no additional comments on this report. CARB and MBAPCD were furnished reports. CARB did not respond; however MBAPCD did respond and comments were satisfactorily addressed. Final issued with no revisions. The Final document is in the Fort Ord Administrative record (OE-0536L).

Completed Area Name: Munitions Response Sites Track 3
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 08/30/2005
Comments: Army conducted a site inspection and surface clearance of residual Munitions and Explosives under a time critical removal action. This area was burned as a result of the prescribed burn that escaped its original boundaries of Ranges 43-48 and was critical due to the vicinity of the MEC to nearby residents.

Completed Area Name: Munitions Response Sites
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 09/08/2005
Comments: Work Plan approved without comment.

Completed Date: 05/26/2005
Comments: DTSC had no further comments, addressed in draft final.

Completed Area Name: Munitions Response Sites
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 08/24/2005
Comments: The Finding of Suitability for Transfer (FOST 9) consisted of 29 parcels (approximately 1,888 acres) of developed and undeveloped land on former Fort Ord. The 29 parcels are Track 0 and "Track 1 parcels. Track 0 parcels contain no evidence of munitions and explosives of concern (MEC) and have never been suspected as having been used for military munitions-related activities of any kind. Track 1 parcels contain sites that may have been used for training, and primarily do not contain any munitions items; if munitions items remain, they do not pose an unacceptable risk based on a site-specific evaluations. The property is to be transferred to several recipients, including California State Parks and Recreation, Monterey County, Caltrans, the Fort Ord Redevelopment Agency (FORA), Monterey County and the Marina Coast Water District for a variety of uses.

Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 12/19/2005
Comments: DTSC had no comments regarding the Draft Semiannual Groundwater Treatment Systems Operations Data Summary Report-January to June 2005 for Sites 2/12 and OU2

Completed Area Name: Munitions Response Sites Track 1
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision
Completed Date: 07/26/2006
Comments: TRACK 1 PLUG IN APPROVAL MEMORANDUM MULTIPLE SITES, GROUPS 1-5 FORMER FORT ORD, CALIFORNIA. The Plug-In Approval Memorandum presents the rationale for designating Munitions Response Site (MRS) 2 (plus extension), MRS-27F, MRS-45A, MRS-59B, Parcel L23.5.2, MRS-43A, MRS-15MOCO-01, MRS-46, MRS-15 DRO-01A, MRS-15 DRO-02A, Parcel L6.1 and Parcel E20c.1.1.1, as Track 1 sites or areas. The sites and areas encompass approximately 325 acres.

Completed Area Name: Munitions Response Sites Track 1
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision
Completed Date: 05/30/2006
Comments: This Approval Memorandum presents the rationale for designating the approximately 114 acre East Garrison Area 2 and the approximately 63 acre northeast portion of East Garrison Area 4 as Track 1 sites or areas. DTSC concurred with the Army that these sites and areas require no further remedial action.

Completed Area Name: Munitions Response Sites Track 0
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision
Completed Date: 07/28/2006
Comments: DTSC issued No Further Action letter regarding Munitions and Explosives of Concern on 7/12/2006. This Approval Memorandum addresses ten Track 0 Plug-in parcels that have been divided into 4 groups based on location, physical features, and proximity to areas of investigation. Sites designated as Track 0 have no evidence of containing Munitions and Explosives of Concern (MEC) and have never been suspected as having been used for military munitions-related activities of any kind. The total Group D parcel acreage is 220 acres.

Comments: Issued for info only. As per the August 2007 BCT meeting, this report is final. Comments will be addressed in the 2007 Annual report.

Completed Area Name: OU1
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/22/2010
Comments: This Groundwater Monitoring Report presents results from groundwater sampling activities conducted within Operable Unit (OU)-1 at the former Fort Ord National Priorities List site, located in Monterey County, California. This report was prepared by HydroGeoLogic, Inc. (HGL) on behalf of the U.S. Army Corps of Engineers (USACE)-Sacramento District, under Contract Number DACA45-03-D-0029. Groundwater sampling is performed at the former Fort Ord as part of an ongoing monitoring program to evaluate the presence and distribution of contaminants of concern (COC). This report presents the fourth quarter 2008 groundwater sampling results, bimonthly treatment system sampling results, and an evaluation of groundwater monitoring conducted throughout 2008.

Completed Area Name: Sites 2/12
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 02/13/2007
Comments: This report summarized the annual treatment system flow rates, operational issues, effluent data, and groundwater extraction system capture zone modeling. DTSC issued comments on 12/11/06. The Army responded in the draft final and DTSC has no further comments.

Completed Area Name: BASEWIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 02/29/2008
Comments: Final report accepted with no comments.

Completed Area Name: RI
Completed Sub Area Name: Site 3
Completed Document Type: Technical Workplan
Completed Date: 10/25/2006
Comments: This workplan outlines additional sampling efforts to define the hot spots that may be considered for additional ecological sampling/monitoring. Based on March 27 2006 meeting outcome, Army will resample 10 hot spots to find best area for future Eco monitoring. Future Eco monitoring is anticipated to occur in late spring or summer 2007 and results will be evaluated in 2007 5-year review. DTSC had no comments on the draft SAP, although a draft final was submitted to address other agency comments. Three meetings were held to discuss this program in 2006. Sampling is anticipated for early spring 2007.

Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 02/08/2007
Comments: All Interim Actions have been completed for Ranges 43-48 and MRS-16. Range 30A Interim Action was suspended due to high wildfire risk associated with prescribed burning. Range 30A was dropped from the Interim Action and will be addressed in the Track 3 Impact Area ROD, scheduled for completion in late 2007.

Completed Area Name: RANGES 43-48, OE-16, RANGE 30A
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 09/25/2006
Comments: Final document contained correction in text that resolves agency issue with lane spacing.

Completed Area Name: RANGES 43-48, OE-16, RANGE 30A
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 07/30/2007
Comments: DTSC accepts this report with no further comments.

Completed Area Name: RANGES 43-48, OE-16, RANGE 30A
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/14/2009
Comments: The Interim Action Munitions Response After Action applies to MRS-16 and encompasses 80 acres. The munitions removal tasks involved Munitions and Explosives of Concern (MEC) removal utilizing anomaly acquisition and investigation using digital geophysical mapping (DGM) data, MEC detection and removal with mag and dig surveys, quality and safety oversight, explosive and munitions debrid management, documentation and reporting. The planned reuse is for a Bureau of Land Management (BLM) habitat preserve for endangered species.

Completed Area Name: SITE 2/12
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 10/26/2006
Comments: This report outlines the operational data, annual groundwater contours, annual isoconcentration maps and plume capture modeling for the Sites 2/12 groundwater extraction and treatment plants. DTSC reviewed this 2003 annual report as well as the 2004 annual report and provided comments on the 2004 annual report. DTSC had no comments on this 2003 report. Army submitted Final Annual Evaluation Report-January to December 2003. This final version responded to Fort Ord Community Advisory Group (CAG) comments dated February 15, 2005. No further comments will be issued by DTSC on this Final Report.

Comments: DTSC e-mailed concurrence with RTC to Army on February 28, 2006. No further comments anticipated and no final draft workplan requested.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 05/02/2006
Comments: Response to comments issued. DTSC has no further comments.

Completed Area Name: MRS - Del Rey Oaks
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability for Early Transfer
Completed Date: 12/02/2004
Comments: DTSC concurred with USEPA's approval of deferral of the CERCLA 120 H covenant, which allowed the "early transfer" of the parcel. The Army had conducted an Ordnance and Explosives (OE) removal action on approximately 300 acres to facilitate transfer of the parcel to City of Del Rey Oaks. City of Del Rey Oaks is planning to develop the area into a Golf Course resort. The Army signed and recorded a land use covenant on this parcel preventing sensitive uses and requiring the City's compliance with an agreement with DTSC and a local ordinance requiring UXO construction support.

Completed Area Name: OU1
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 01/31/2007
Comments: Final Report submitted. This report presented as-builts and the capture effectiveness of the groundwater extraction system installed at the down gradient boundary of OU1. DTSC submitted minor comments on 11/28/06 to address changes in as-built engineering drawing changes without certified stamp of engineer of record.

Completed Area Name: OU1
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 02/10/2006
Comments: Approved pending revised Rebound quarterly monitoring Program

Completed Area Name: OU1
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 02/10/2006
Comments: This evaluation was completed to fully characterize the OU1 plume area and included additional borings and pump testing to confirm the site conceptual model of a stratigraphic channel with preferential flow paths.

Completed Area Name: OU1
Completed Sub Area Name: Fritzsche Army Airfield Fire Drill Area
Completed Document Type: Monitoring Report
Completed Date: 02/23/2006
Comments: This tech memo summarized the COC data to date in trend graphs and proposed a rebound study for the OU1 source area. The Army suggested a rebound monitoring program and DTSC approved the new program with slight modifications.

Completed Area Name: OU1
Completed Sub Area Name: Fritzsche Army Airfield Fire Drill Area
Completed Document Type: Design/Implementation Workplan
Completed Date: 05/05/2006
Comments: DTSC approved this design document for a Hydraulic Control System at the leading edge of the OU1 TCE groundwater plume. The workplan objectives were met including defining offsite hydraulic conductivity, estimating the rate of groundwater plume migration, and modeling various groundwater remedy scenarios. The extraction system will consist of 4 extraction wells and infiltration trenches for water treated with activated carbon. The design specifications and construction drawings are provided in the Hydraulic Control Pilot Project Workplan, uploaded to this site. The pump and treat system will be constructed during Summer 2006.

Completed Area Name: OU1
Completed Sub Area Name: Fritzsche Army Airfield Fire Drill Area
Completed Document Type: Operations and Maintenance Report
Completed Date: 05/05/2006
Comments: This report presents the results from groundwater sampling activities conducted in Operable Unit 1 (OU-1). Sampling is performed at the former Fort Ord as part of an on-going monitoring program to evaluate the presence of contaminants of concern. This report presents third quarter sampling results and bimonthly treatment system sampling results.

Completed Area Name: OU1
Completed Sub Area Name: Fritzsche Army Airfield Fire Drill Area
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/07/2006
Comments: The 60% and the 100% Design Reports Volume 2 of 3 provides details regarding pump test results, groundwater modeling, extraction wells and piping design for the groundwater pump and treat system to be installed at Fort Ord Nature Reserve in the center of the OU1 TCE groundwater plume. The extraction system will consist of five extraction wells, 2 infiltration trenches and two injection wells. DTSC had no further comments on the 60% Volume II design report and issued a final approval letter on the 100% design report on June 7, 2006.

Completed Area Name: Interim Action
Completed Sub Area Name: Not reported
Completed Document Type: *Action Memorandum (if <\$1M)
Completed Date: 05/01/2005
Comments: Action Memorandum approved for removal of about 600 cubic yards of soil from ranges HA-80 and HA-85. Field activities are scheduled for summer 2005.

Completed Area Name: Interim Action
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 04/18/2006
Comments: DTSC had no further comments on this confirmation report for soil removal and offsite disposal at Kettleman Hills Landfill of approximately 600 cubic yards of soil from historical areas (HA-80 and HA-85). This soil removal project was completed in accordance with the Approval Memorandum dated April 6, 2005. These areas were

EPA ID Number

FORT ORD, CA (Continued)

S101272787

identified during site investigation activities completed under the Basewide Range Assessment program. All confirmation samples results were less than the Target Cleanup Concentrations, therefore the remedial action objectives were achieved. This soil removal excavation and confirmation sampling was conducted in June and July 2005 and the soil was removed in September 2005 in accordance with the Approval Memorandum dated April 6, 2005. These areas were identified during site investigation activities completed under the Basewide Range Assessment program. All confirmation samples results were less than the Target Cleanup Concentrations, therefore the remedial action objectives were achieved. Text of IA ROD is uploaded and entire document is available on the administrative record at www.fortordcleanup.com/adminrec/ar_pdfs/AR-IAFS-232.

Completed Area Name: RI
Completed Sub Area Name: 31
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/01/2006
Comments: Approximately 1,500 cubic yards of lead contaminated soil was removed from Site 31 and placed in the Operable Unit 2 landfill. Approximately 3,700 cubic yards of soil was left in place below the surface of a sloped portion of the site with an average concentration of 550 mg/kg of lead. DTSC issued a letter dated June 11, 1999, indicating that although the lead contaminated soil was on a steep slope, significantly below the surface, and the likely overall site risk is low, long term management of this area is still necessary in the form of a Land Use Covenant (LUC). This No Further Action letter summarizes the previous remedial activities and correspondence, and provides conditional approval upon signature and recording of the associated LUC.

Completed Area Name: Interim Action
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 02/04/1997
Comments: Approval letter issued for earlier removal action completion. DTSC concerns regarding chemical contamination have been addressed, but Munitions and Explosives of Concern (MEC) shall be addressed in the East Garrison Areas 2 and 4 NE Track 1 Approval Memorandum.

Completed Area Name: Interim Action
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 03/10/2006
Comments: The soil removal from 4 areas was partially completed in the late 1990s, although additional work was completed in 2005 to remove lead shot and clay target debris from the Trap and Skeet Range to residential standards based on a letter issued by the DTSC entitled "Determination of No Further Action for a Portion of the East Garrison Parcel, Trap and Skeet". DTSC concerns regarding chemical contamination have been addressed on all areas of Site 39A.

Completed Area Name: OU2
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 05/17/2006
Comments: This workplan details the engineering design for the additional

S101272787

groundwater extraction well and piping to be added at the leading edge of the OU2 Plume. This workplan provided piping diagrams, well construction details, pump sizing information and maps of the proposed locations. DTSC emailed the Army that we had no comments on this document, which was uploaded into the Admin Record. The full report can be found at
http://www.fortordcleanup.com/adminrec/ar_pdfs/AR-OU2-648L

Completed Area Name: Munitions Response Sites Track 2
Completed Sub Area Name: OE-15MOCO.2
Completed Document Type: Removal Action Completion Report
Completed Date: 07/20/2006
Comments: This report describes the field activities and associated documentation for a removal action at MRS MOCO. DTSC concurred with EPA comments. No issues to resolve.

Completed Area Name: OU1
Completed Sub Area Name: Fritzsche Army Airfield Fire Drill Area
Completed Document Type: Design/Implementation Workplan
Completed Date: 10/02/2006
Comments: This Vol 3 of 3 design document provides details of engineering calculations, specifications and electrical, piping and mechanical drawings for the Groundwater Extraction System to be installed in the center of the Fort Ord Nature Reserve (FONR). The system will consist of extraction wells and injections galleries with activated carbon treatment. DTSC concurred with the response to comments. Because this was the last volume of the design document, this letter serves as the Approval Letter for the entire OU1 expanded groundwater pump and treat system design.

Completed Area Name: RI SITES
Completed Sub Area Name: Site 39
Completed Document Type: Risk Assessment Report
Completed Date: 11/20/2004
Comments: This workplan outlines the sampling methods and procedures for collection of samples and biota to support an ecological risk assessment at the small arms ranges (Site 39). No comments were issued the Draft Final document, therefore it became Final in accordance with the FFA.

Completed Document Type: Remedial Action Completion Report
Completed Date: 09/20/2000
Comments: The soil was removed in accordance with the IROD. Rod states a lead cleanup level of 1,860 ppm of lead. EPA letter dated September 20, 2000 gave approval. DTSC letter disagrees with that lead cleanup level (document uploaded). After action report showed that cleanup achieved acceptable lead levels. The entire remedial action confirmation report can be downloaded at

Completed Area Name: Munitions Response Sites
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 09/12/2006
Comments: On Sept 12, 2006, DTSC concurred with the unsigned version of the Finding of Suitability for Transfer (FOST 10) consisted of 28 parcels (approximately 720 acres) of developed and undeveloped land and 24 buildings on former Fort Ord. The 28 parcels are Track 0 and "Track 1 parcels. Track 0 parcels contain no evidence of munitions and explosives of concern (MEC) and have never been suspected as having been used for military munitions-related activities of any kind. Track 1 parcels contain sites that may have been used for training, and primarily do not contain any munitions items; if munitions items remain, they do not pose an unacceptable risk based on a site-specific evaluations. The property is to be transferred to several recipients, including Monterey County, the Fort Ord Redevelopment Agency (FORA), Monterey Salinas Transit, Marina Coast Water District, Monterey Peninsula College, York School, City of Monterey and Monterey County for a variety of uses. The Final signed FOST will be uploaded after EPA concurrence has been received.

Completed Area Name: SITE 2/12
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Manual
Completed Date: 08/30/2006
Comments: The 2/12 Treatment System is being enhanced with new extraction wells and an air stripper. This Sampling and Analysis Plan (SAP) updates the existing O&M manual to incorporate sampling done during the startup phase of the Sites 2/12 Augmentation. Samples will be collected in accordance with this SAP to monitor the air stripper's effectiveness in removing vinyl chloride during the startup phase. DTSC reviewed but had no comments on the revised SAP for Sites 2/12

Completed Area Name: MRS - Del Rey Oaks
Completed Sub Area Name: Not reported
Completed Document Type: * Reuse Document
Completed Date: 09/09/2004
Comments: DTSC approved 09/09/04. The army designated the Fort Ord Reuse Authority (FORA) to sign and the City of Del Rey Oaks also signed. This agreement outlines the requirement that the Army and the Department of Toxic Substances Control (DTSC) will enter into a Covenant to Restrict Use of Property (CRUP) prior to property transfer to prohibit certain land uses on the property, and require compliance with this agreement. This agreement includes but is not limited to, Del Ray Oaks implementing a program of construction support and military munitions education and awareness, special attention being given to soil disturbances in the Range 26 Berm Area, an Ordinance restricting digging and excavating on the parcel and other additional activities and reporting processes.

Completed Area Name: Munitions Response Sites Track 3
Completed Sub Area Name: Not reported
Completed Document Type: Proposed Plan
Completed Date: 09/30/2007
Comments: Public Comments will be addressed in the Record of Decision. The Record of Decision includes approximately 6560 acre. The selected remedy describes current or potential explosive safety risks to human

Completed Date: 10/20/2006
Comments: Soil removal is complete for approximately 160 cubic yards of soil impacted with total petroleum hydrocarbons and semi-volatile organic compounds from beneath metal debris. The soil was excavated and disposed in accordance with Approval Memorandum, Proposed Interim Action Excavation, IA Area 39B, Site 39B, Inter-Garrison Site. The removal was completed in 1996 and approved by EPA and DTSC, although an approval letter was not issued by DTSC until 2006.

Completed Area Name: RANGES 43-48, OE-16, RANGE 30A
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 05/01/2007
Comments: DTSC comments addressed in Final version, revision 1; however, errors still remain in some tables and text.

Completed Area Name: Munitions Response Sites Track 0
Completed Sub Area Name: Not reported
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 05/27/2003
Comments: This FOST transferred land to UCMBEST.

Completed Area Name: Transfer Parcels
Completed Sub Area Name: Fritzsche Army Airfield Parcel, Phase 1
Completed Document Type: Finding of Suitability for Early Transfer
Completed Date: 08/01/2000
Comments: This finding of suitability for early transfer document transfers 86.83 acres of land to Marina.

Completed Area Name: OU2
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 10/26/2006
Comments: No comments were submitted by the public or regulatory agencies on this specific report, although a final version has been submitted to address general comments on the Site 2/12 Annual 2003 report. No further comments were issued by DTSC on this Final Report.

Completed Area Name: OU Carbon Tetrachloride Plume
Completed Sub Area Name: Not reported
Completed Document Type: Treatability Study Workplan
Completed Date: 02/28/2007
Comments: A revised OUCTP Pre-Investigation workplan will not be issued, but it will be replaced with a new pilot study workplan

Completed Area Name: OU2
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision w/ESD
Completed Date: 08/15/2006
Comments: This ESD amends/clarifies the OU2 ROD as described in the ESD title. This OU2 Landfill ESD clarifies non-fundamental changes to the 1994 OU2 ROD. Changes include: 1) No MEC has been found in the landfill 2) intent of the CAMU language 3) the landfill gas extraction system has been upgraded to a combustion system and 4) treated water from the OU2 groundwater extraction system will be used for dust control during construction. The ESD was signed by the Army, DTSC, and finalized by the EPA on 10/4/06.

monitoring data, treatment plant data, and a hydraulic capture analysis during the 2009 reporting period for the treatments systems for OU 2 (Volume 1) and Sites 2/12 (Volume 2). Guidance contained in the U. S. EPA document titled O&M Report Template for Groundwater Remedies (USEPA, 2005) was utilized for this report.

Completed Area Name: BASEWIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 06/16/2010
Comments: The groundwater monitoring program at the former Fort Ord in Monterey County, California, consists of quarterly and annual groundwater monitoring within the former base footprint (including wells located in Sites 2 and 12, Operable Unit 2 [OU2], and the Operable Unit Carbon Tetrachloride Plume [OUCTP], and other areas). The format of the quarterly monitoring reports has been streamlined such that the text contains an overview of the field program and a summary of significant results for each of the contaminant plume areas relative to previous monitoring results. Detailed discussions of groundwater monitoring results are presented in the Annual Reports of Quarterly Monitoring. The document is provided to DTSC for information only and is reviewed by staff. Any comments noted would be discussed in the annual report.

Completed Area Name: BASEWIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 08/23/2010
Comments: This report includes groundwater data collected during quarterly and annual groundwater monitoring activities at wells associated with Sites 2 and 12, Operable Unit 2 (OU2), Operable Unit Carbon Tetrachloride Plume (OUCTP), and other areas not affiliated with an operable unit (Plate 1-1). Data presented in this report were collected over four quarterly monitoring events conducted in December 2008, March 2009, June 2009, and September 2009. Data for the December 2008, March 2009, and June 2009 monitoring events were presented in individual quarterly monitoring reports.

Completed Area Name: OU1
Completed Sub Area Name: Fritzsche Army Airfield Fire Drill Area
Completed Document Type: Monitoring Report
Completed Date: 08/05/2010
Comments: Groundwater sampling is performed at the former Fort Ord as part of an ongoing monitoring program to evaluate the presence and distribution of contaminants of concern (COC). This report presents the third quarter 2009 groundwater sampling results, treatment system sampling results, and an evaluation of groundwater monitoring conducted through September 2009. Because of the reduction in sampling frequency adopted in 2009 from quarterly to semiannual, this report also serves as the Annual Groundwater Monitoring Report for 2009 and summarizes conditions observed from January 1, 2009, through September 28, 2009.

Completed Document Type: Operations and Maintenance Report
Completed Date: 02/23/2010
Comments: The annual report presents the results of the landfill gas probe monitoring, thermal treatment unit (TTU) source testing, TTU and landfill operations and maintenance conducted in 2008 at the Operable Unit 2 landfills.

Completed Area Name: OU Carbon Tetrachloride Plume
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 07/20/2010
Comments: The Operable Unit Carbon Tetrachloride Plume (OUCTP) Upper 180-Foot Aquifer Remedial Design (RD) addresses the remediation of groundwater within the Upper 180-Foot Aquifer of the OUCTP at the former Fort Ord, California. The remediation of the Upper 180-Foot Aquifer will utilize groundwater extraction and aboveground treatment to minimize further migration of the OUCTP from the Upper 180-Foot Aquifer to the Lower 180-Foot Aquifer. A groundwater well will be installed to extract groundwater contaminated with carbon tetrachloride from the Upper 180-Foot Aquifer. The extraction well will be connected to the existing groundwater extraction pipeline that conveys water to the Operable Unit 2 (OU2) Groundwater Treatment Plant (GWTP). At the OU2 GWTP, the groundwater will be treated through liquid phase granular activated carbon (GAC) to remove the contaminants before the treated water is reinjected into the subsurface through existing injection wells. The RD when finalized will become an appendix to the OUCTP Remedial Action Work Plan (RAWP) (Shaw, 2009).

Completed Area Name: OU Carbon Tetrachloride Plume
Completed Sub Area Name: Not reported
Completed Document Type: Pilot/Treatability Study Report
Completed Date: 08/31/2009
Comments: A report was prepared to present the results of an enhanced in situ bioremediation (EISB) pilot study conducted to gather data necessary to complete the design of the full-scale system for the remediation of the Operable Unit Carbon Tetrachloride Plume (OUCTP) at former Fort Ord, Marina, California. The pilot study was conducted to evaluate methods of distributing substrate within the A-Aquifer and

Completed Sub Area Name: Site 39
Completed Document Type: Removal Action Design
Completed Date: 11/09/2009
Comments: The habitat restoration plan (HRP) for the Site 39 Inland Ranges describe the procedures to restore native habitat in the areas impacted from remediation of contaminated soils as specified in the Site 39 ROD amendment. This HRP provides general methodologies for the assessment of pre-remediation habitat conditions, protocols for both active and passive restoration, monitoring and reporting protocols, success criteria, adaptive management, and weed management. Not reported

Completed Area Name: OU1
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 05/29/2008
Comments: This Work Plan describes the design, installation, and operation of the Off-Site Groundwater Extraction Pilot Study (herein referred to as the pilot study) at Operable Unit 1 (OU1) Fritzsche Army Airfield Fire Drill Area (FDA) at former Fort Ord, Marina, California. The pilot study is being conducted to address groundwater contaminated by trichloroethene (TCE) that has migrated downgradient of the former Fort Ord property boundary, under the adjacent property (Armstrong Ranch), and potentially under a residential area that is part of the City of Marina. The primary goals of the pilot study are as follows: Collect additional data on the extent of groundwater impacted by TCE and the groundwater flow conditions downgradient of the former Fort Ord property boundary. Determine the impact to groundwater under the residential area within the City of Marina. Collect data on groundwater extraction rates and long-term impact to the off-site plume from groundwater extraction. Evaluate short-term and long-term requirements for extracted groundwater treatment and disposal. Initiate groundwater extraction to remove mass at the highest measured TCE concentrations and above the Aquifer Cleanup Level (ACL) of 5.0 micrograms per liter (8g/L).

Completed Area Name: Munitions Response Sites Track 3
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 08/13/2008
Comments: The Prescribed Burn plan discusses the preparations and procedures required to implement the prescribed burn for BLM-Units 18 and 22 as a component of the Track 3 Impact Area Record of Decision. DTSC provided comments via email to the Army which were incorporated in the final version. Comments provided, by DTSC, have been addressed.

Comments: Our DTSC comments (letter dated 7/17/2008) was a request for additional information in subsequent annual reports and to agree with resolution on salt water intrusion. No response or final letter needed.

Completed Area Name: Munitions Response Sites Track 3
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 12/25/2007
Comments: Burn Plan for these Units will not be implemented until completion of Track 3 Impact Area ROD, scheduled for Summer of 2008.

Completed Area Name: Munitions Response Sites Track 3
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 10/15/2008
Comments: This is the first of several Remedial Action Implementation Workplans that will be completed for the 6500 acre Impact Area. This Workplan describes the site-specific procedures to implement the MEC removal activities within Impact Area BLM-Units 18 and 22, approximately 130 acres. Brush was burned on these parcels in December 2008.

Completed Area Name: Munitions Response Sites Track 3
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 07/07/2008
Comments: Final Work Plan MRS-BLM Units 1-5 MEC Removal. Includes MRS-BLM Units 1-5 Prescribed Burn Plan, Prescribed Burn Air Sampling and Analysis Plan and MRS-BLM Units 1-5 Notification Plan.

Completed Area Name: Munitions Response Sites Track 3
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 10/16/2009
Comments: Final document has been issued.

Completed Area Name: Landfill
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 04/07/2009
Comments: This report presents the results of the landfill gas (LFG) probe monitoring and thermal treatment unit (TTU) source testing conducted in 2007 at the Operable Unit 2 (OU2) Landfills, former Fort Ord, California. This report also presents the operations summary and monitoring associated with the TTU.

Completed Area Name: Munitions Response Sites Track 2
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 08/04/2009
Comments: DTSC concurs with the Final document. The following land use performances are described in the document. MEC recognition and safety training, construction monitoring and restrictions against residential use.

Comments: DTSC comments to the Draft Final and previous versions have been addressed. Additional information to be provided in proposed Track 1 Plug-In Approval Memorandum.

Completed Area Name: SITE 2/12
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 05/07/2009
Comments: The Construction Completion Report (CCR) describes modifications to the existing groundwater remedy at Sites 2 and 12 (Sites 2/12), former Fort Ord, Marina, California. The modifications follow the Treatment Augmentation Work Plan, Sites 2 and 12 Groundwater Remedy Expansion (Sites 2/12 Work Plan) (Shaw, 2006). The treatment augmentation includes the installation of a modified low profile air stripper, with vapor treatment by a substrate impregnated with potassium permanganate.

Completed Area Name: OU2
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 10/16/2009
Comments: Ahnta Engineering Services (AES) has prepared this Sampling and Analysis Plan (SAP) detailing field and laboratory procedures for evaluating the groundwater treatment systems (GWTS) and their respective discharge compliance points at Operable Unit 2 (OU2) and at Sites 2 and 12 (Sites 2/12) at former Fort Ord, California. This document supersedes the previous SAP (AGSC 2004). This SAP summarizes the sampling and analyses procedures for monitoring concentrations of site-specific chemicals of concern (COC) in the extraction wells, the granular activated carbon (GAC) vessel effluent, throughout the Groundwater Treatment Plant (GWTP) and at the discharge points of compliance. This SAP, in Sections 2 through 10, describes site histories, project descriptions, project organization, data quality objectives, sampling and process design, sampling methods requirements, analytical methods summary, investigation derived waste handling, and quality control (QC) procedures governing the collection and analysis of environmental samples collected by AES and subcontractors at the former Fort Ord.

Completed Area Name: OU1

requirements necessary to meet this objective.

Completed Area Name: OU2
Completed Sub Area Name: CTP
Completed Document Type: Remedial Action Completion Report
Completed Date: 05/29/2010
Comments: Final Interim Action Completion Report, Operable Unit Carbon Tetrachloride Plume, Former Fort Ord, California (former title was Close Out Report Pilot Soil Vapor Extraction and Treatment, OUCTP) This Interim Remedial Action Completion report (IRACR) describes the completion of the pilot soil vapor extraction (SVE) and treatment conducted to remediate vadose zone soils in a suspected source area for the Operable Unit Carbon Tetrachloride Plume (OUCTP) at former Fort Ord, Marina, California. The pilot SVE was performed as part of the then ongoing OUCTP Remedial Investigation (Mactec, 2006). The pilot SVE was implemented because analytical results from soil gas and groundwater samples collected in the vicinity of Lexington Court and Ready Court suggested that a source of carbon tetrachloride (CT) was present in the vadose zone soils in this area (Mactec, 2004). These previous investigations showed that soil gas concentrations were higher in proximity to the water table than at shallow depths.

Completed Area Name: Munitions Response Sites Track 3
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 07/14/2009
Comments: The Plan describes the set of guidelines of intended activities to achieve a desired objective, regarding prescribed burns within the former Impact Area. DTSC provided comments in coordination with review from the California Air Resources Board. These comments have been satisfactorily addressed in the Final document.

Completed Area Name: Munitions Response Sites Track 3

Completed Date: 04/09/2009
Comments: This letter presents the Third Quarter 2008 Groundwater Monitoring Report. As approved during the May 17, 2006, Fort Ord Base Realignment and Closure Cleanup Team meeting, this report consists of a cover letter with attached tables, figures, field forms (Attachment A), and validated data reports (Attachment B). The following sections provide a summary of the results of the July and September 2008 bimonthly NWTs sampling and the Third Quarter 2008 groundwater monitoring activities conducted at OU-1.

Completed Area Name: Interim Action
Completed Sub Area Name: Not reported
Completed Document Type: *Correspondence - Received
Completed Date: 05/01/2009
Comments: The Approval Memorandum (AM) documents the proposed interim action excavation at IA Area 39B HA-161, DTSC provided comments on the AM and our comments were addressed. The AM follows the process identified in the Interim Action ROD (1994).

Completed Area Name: MMRP Remaining Remedial Investigation/Feasibility Study Areas
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 02/11/2010
Comments: This work plan addresses the process for evaluating remaining areas within the former Fort Ord where Munitions Response activities and associated CERCLA documentation are not complete. The remaining RI/FS areas include both previously identified Munitions Response Sites (MRSs) and some areas in between existing MRSs. The work plan presents the process that will be used to investigate the Remaining RI/FS areas, summary information and the proposed approach for each of the geographic areas, the investigation approach and conceptual site models, project organization, and project schedule. The work plan applies to approximately 8000 acres.

Completed Date: 03/21/2010
Comments: This Quality Assurance Project Plan (QAPP) describes MACTEC's overall program management approach to chemical quality control (QC) for groundwater sampling activities to be performed at the former Fort Ord (Fort Ord). Fort Ord is a former U.S. Department of the Army (Army) military base adjacent to Monterey Bay in northwestern Monterey County, California, approximately 80 miles south of San Francisco. This QAPP defines the chemical quality control (QC) program, data acquisition procedures and criteria, and oversight of assessment protocols that are to be used for the Groundwater Monitoring Program, Sites 2 and 12, OU2 and OUCTP. This QAPP and attached Field Sampling Plan (FSP), along with the stand alone Project-Specific Sampling and Analysis Plan (SAP) comprise the Basewide Chemical Data Quality Management Plan (CDQMP) for the former Fort Ord. The purposes of this Field Sampling Plan (FSP) are to identify the general field activities that are to be performed under United States (U.S.) Department of the Army (Army), Sacramento USACE contracts, and provide guidance for sample collection and field measurements at Fort Ord. This FSP contains standard procedures and specifications for project staff that performs or monitors field activities, and describes field procedures that are to be planned and implemented so that sample integrity is maintained through collection, containerization, preservation, handling, storage, or transport. In addition, Appendix A contains Project-Specific SAP requirements that will be used to develop Project-Specific SAPs for each definable feature of work. The Project-Specific SAPs will specify the required methods/procedures, documentation, equipment, materials, schedule, and QC requirements relevant to each project. Information about the Fort Ord site background can be found in the QAPP and the Final Basewide Remedial Investigation/Feasibility Study, (RI/FS) Fort Ord, California (HLA, 1995).

Comments: This remedial design (RD) addresses the remediation of groundwater within the Lower 180-Foot Aquifer of the OUCTP at the former Fort Ord, California. The remediation of the Lower 180-Foot Aquifer will utilize monitored natural attenuation (MNA) to ensure that all remedial action objectives (RAOs) are met. This RD presents the basis for the design and the specific requirements for implementation of MNA for the OUCTP within the Lower 180-Foot Aquifer. As part of the implementation of MNA, monitoring will be conducted to evaluate changes in the concentration and extent of the OUCTP within the Lower 180-Foot Aquifer and to ensure that exposure to potential receptors is minimized during the time frame that contaminant concentrations are reduced to the Aquifer Cleanup Levels. Groundwater modeling was conducted as part of this RD to evaluate the fate and transport of the OUCTP in the Lower 180-Foot Aquifer and to evaluate the time frame required to achieve cleanup goals. The RD also includes a contingency plan to be implemented if the concentration of carbon tetrachloride in downgradient water production wells exceeds the Maximum Contaminant Level (MCL).

Completed Area Name: OU1
Completed Sub Area Name: Fritzsche Army Airfield Fire Drill Area
Completed Document Type: Record of Decision w/ESD
Completed Date: 08/10/2010
Comments: The Army has prepared an Explanation of Significant Differences (ESD) for the Record of Decision, Operable Unit 1, Fire Drill Area (May 1996) to address: (1) A change in the physical area of the response. Specifically, groundwater contaminated by trichloroethene (TCE) migrated outside the capture zone of the original groundwater extraction and treatment system (GWETS). The TCE plume extended downgradient of the former Fort Ord property boundary and under the adjacent property (Armstrong Ranch), which altered the size and configuration of the remedial action; (2) Significant changes in costs from the estimates in the OU1 ROD due to the change in the size of the remedial area; and (3) After the OU1 ROD was signed, institutional controls regarding contaminated groundwater at the former Fort Ord were developed and implemented.

Completed Area Name: Munitions Response Sites Track 3
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 08/30/2010
Comments: The document was finalized with all DTSC comments or concerns addressed.

Completed Area Name: OU1
Completed Sub Area Name: Fritzsche Army Airfield Fire Drill Area
Completed Document Type: Monitoring Report
Completed Date: 06/29/2010
Comments: This report describes the operation and maintenance of the Off-Site Groundwater Extraction Pilot Study (herein referred to as the pilot study) groundwater extraction and treatment system (GWETS) and the results of quarterly groundwater monitoring activities at Operable Unit 1 (OU1) Fritzsche Army Airfield Fire Drill Area (FDA) at former Fort Ord, Marina, California, from October to December 2009. The document was submitted as part of the groundwater quarterly monitoring program for information only as is reviewed by staff. Any comments on the document is addressed in annual report.

Completed Area Name: RI
Completed Sub Area Name: 39
Completed Document Type: Technical Workplan
Completed Date: 10/30/2012
Comments: This Final Site Specific Restoration Plan (SSRP) was prepared for Historic Areas (HA) 18, 19, 22, 23, 26, 27, 27A, 28, 29, 33, 34, 37, 38, 39/40, 43, 44, 48 and the Austin Road Stockpile Area. The plan was prepared following the strategy presented in the Final Habitat Restoration Plan for Site 39 Inland Ranges, prepared by Shaw Environmental, Inc. (Shaw 2009). The restoration plan provides the general restoration approach to all sites. Comments were provided by CA Dept of Fish and Wildlife and incorporated into the final document. Not reported

Completed Document Type: Technical Report
Completed Date: 04/23/2011
Comments: Well production enhancement activities were conducted in extraction well EWOU2- 09-180 during late November and early December 2010 in order to enhance the production of groundwater. The well production enhancement work included chemical treatment, well jetting, surging, and airlifting. Specific capacity-recovery testing was also conducted after the well enhancement activity was completed in order to evaluate the results of the work. A chronology of well production enhancement activities, significant observations made during the field work, results of the specific capacity-recovery testing, and recommendations for further work are provided in the attached technical information paper.

Completed Area Name: OU1
Completed Sub Area Name: Fritzsche Army Airfield Fire Drill Area
Completed Document Type: Technical Report
Completed Date: 08/09/2011
Comments: Based on the effectiveness of the OU-1 remediation system and the decreased zone of groundwater contamination, HGL recommends that 55 wells be destroyed. Groundwater cleanup targets at these wells have been met since 2007 at one well and since before 2005 at all others. The wells recommended for destruction include the following: (1) The original GWETS wells installed in 1988 and the associated piezometers, (2) Monitoring wells located within the capture zone of the original GWETS, (3) All but one of the monitoring and injection wells installed as part of the ERD pilot study, (4) Selected wells meeting the cleanup targets and located outside the footprint of the remediation zone, and (5) The four OU-1 wells screened below the A-Aquifer. Well destruction activities will be coordinated with the UCSC FONR management staff and conducted in accordance with protective guidelines to minimize impact to the habitat and rare plant species within the FONR. Field activities within the sensitive habitat area will be initiated only after the rare plant blooming season has ended. The destruction effort is planned to be completed before September 2011.

Completed Date: 09/16/2012

Comments: The Final Comprehensive Basewide Range Assessment Report, Revision 2 presents the status of the individual Historical Areas (HAs) located within the Former Fort Ord. This report was first issued as Revision 0 after public and agency review in 2005 and later updated as Revision 1 in 2009 (AR # BW-2300J). The date of the different updates can be found in Table 3-1 of the main report. This revision presents an update to HAs where additional site characterization and remediation have been completed in accordance with the requirement of the Final, Record of Decision Amendment, Site 39 Inland Ranges (Site 39 ROD Amendment; Army, 2009; AR # RI-041E). The Site 39 ROD Amendment states: During the munitions response at the Impact Area MRA, the Army will continue to conduct characterization of metals and constituents of explosives in soil within Site 39 Inland Ranges that are associated with former military munitions range uses. The Army will evaluate the data in a timely manner to determine whether sampling is required to characterize an area further with respect to potential soil contamination from military munitions. If there is evidence that military munitions recovered from the subsurface have degraded and released constituents of explosive or metals into soils, these specific locations will be evaluated to determine if additional sampling or remediation for constituents of explosives or metals is necessary. This report is updated as site characterization and soil remediation activities are completed at various areas within the Former Fort Ord. This report includes updates for activities conducted between 2009 and 2011. DTSC Staff had reviewed and had no comments on the updated sections of the Basewide Range Assessment Report.

Completed Area Name: OU2

Completed Document Type: Technical Report
Completed Date: 04/24/2012
Comments: This data summary report was prepared to present the results of the enhanced in situ bioremediation (EISB) conducted as part of the Remedial Action for the A-Aquifer of the Operable Unit Carbon Tetrachloride Plume (OUCTP) at former Fort Ord, California. The strategy for applying EISB in the A-Aquifer of the OUCTP is to enhance the natural attenuation of the plume by treating several known hot spots (remove mass at areas where higher concentrations of carbon tetrachloride remain) within the plume and continue monitoring changes in the plume as concentrations decrease to Aquifer Cleanup Levels. This data summary report includes the data collected during the implementation of EISB at Deployment Area 1C. Deployment Area 1C included 11 extraction wells and 7 injection wells used to recirculate groundwater and distribute the substrate in the subsurface.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 03/05/2014
Comments: The Quality Assurance Project Plan(QAPP), Volume 1, is a primary project planning document used for the implementation of the sampling and analysis program for groundwater monitoring wells and groundwater treatment systems at the former Fort Ord. This QAPP supersedes the QAPP issued in December 2012.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 05/03/2013
Comments: This annual report for the former Fort Ord evaluates the OU 2 and Operable Unit Carbon Tetrachloride Plume Upper 180-Foot Aquifer and Sites 2 and 12 (Sites 2/12) groundwater remedies for the period of January 1 through December 31, 2012. This 2012 annual evaluation report presents a discussion of OU2 and Sites 2 and 12 (Sites 2/12) groundwater treatment system performance, an evaluation of monitoring data, including treatment plant operations data, and a hydraulic capture analysis during the 2012 annual reporting period.

Completed Document Type: Monitoring Report
Completed Date: 03/25/2013
Comments: This Groundwater Monitoring Report presents results from groundwater sampling activities conducted within Operable Unit (OU)-1 at the former Fort Ord located in Monterey County, California. This report was prepared by HydroGeoLogic, Inc. (HGL) on behalf of the U.S. Army Corps of Engineers Sacramento District. Groundwater sampling is performed at the former Fort Ord as part of an ongoing monitoring program to evaluate the presence and distribution of chemicals of concern (COC). This report presents the third quarter 2012 long term groundwater monitoring results, treatment system sampling results, and an evaluation of groundwater monitoring data collected through September 2012.

report also summarizes post-treatment groundwater monitoring at OUCTP and OU1 Off-Site A-Aquifer wells associated with concluded remedial activities. This report is issued final and review by DTSC staff. Any comments noted are incorporated in subsequent quarterly or annual groundwater monitoring reports.

Completed Area Name: OU2
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 07/13/2012
Comments: This annual report for the former Fort Ord evaluates the OU 2 and Sites 2 and 12 (Sites 2/12) groundwater remedy for the period of January 1 through December 31, 2011. This 2011 annual evaluation report presents a discussion of OU2 and Sites 2 and 12 (Sites 2/12) groundwater treatment system performance, an evaluation of monitoring data, including treatment plant operations data, and a hydraulic capture analysis during the 2011 annual reporting period.

Completed Area Name: OU1
Completed Sub Area Name: Fritzsche Army Airfield Fire Drill Area
Completed Document Type: Technical Report
Completed Date: 04/28/2012
Comments: This memorandum describes the changes in operation resulting from the optimization evaluation of the ongoing Operable Unit 1 (OU-1) pump and treat remedy. The changes in operation are consistent with the key elements of the Record of Decision and will reduce greenhouse gas emissions, decrease the potential impact to sensitive habitat within the Fort Ord Natural Reserve, and reduce operation and maintenance costs. The memo was reviewed and DTSC's staff had no comments on the document.

Completed Area Name: OU2
Completed Sub Area Name: CTP
Completed Document Type: Remedial Action Completion Report
Completed Date: 10/02/2012
Comments: This Construction Completion Report was prepared to document the completion of recent construction activities designed to support the remedial action for the Operable Unit Carbon Tetrachloride Plume (OUCTP) Upper 180-Foot Aquifer at former Fort Ord, California. The completed construction consists of a single extraction well (EW-OU2-09-180) and mechanical equipment (pump, buried piping, instrumentation, and controls) to extract groundwater and convey it to the existing Operable Unit 2 (OU2) Groundwater Extraction Treatment System (GWETS). The objective of the remedial action within the OUCTP Upper 180-Foot Aquifer is to extract groundwater from the downgradient edge of the plume in that aquifer to remove contaminant mass and to minimize further impact to the Lower 180-Foot Aquifer by capturing the contaminated groundwater before it reaches the area of vertical communication through the Intermediate 180-Foot Aquitard.

Completed Document Type: Technical Workplan
Completed Date: 11/10/2012
Comments: This Soil Gas Investigation Work Plan (Work Plan) describes the proposed soil gas investigation activities to be performed at Sites 2 and 12, part of the Former Fort Ord located in Monterey County, California (Site). This work plan describes the proposed soil gas investigation activities, sample collection locations, sample collection methodologies, and sample analyses to evaluate for the potential vapor intrusion at Sites 2 and 12. It also contains a Field Sampling Plan (FSP), a Quality Assurance Project Plan (QAPP) in Appendix B, and a Site Health and Safety Plan (HASP) in 2 Appendix C. The FSP presents detailed field procedures to be followed during the investigation. It includes site-specific objectives, sampling strategy and rationale, sampling locations, and sample collection methods and procedures. The QAPP presents procedures, objectives, and specific quality assurance and quality control requirements designed to achieve the data quality goals identified herein. The HASP describes the health and safety requirements for the protection of workers and the surrounding community during work performance.

Completed Document Type: Monitoring Report
Completed Date: 10/01/2012
Comments: This report presents a discussion of Operable Unit 1 (OU-1) remediation system performance, an evaluation of groundwater monitoring data, and plume capture for calendar year 2007. For any given year the annual groundwater monitoring report is submitted in the following spring. This annual report is presented out of sequence because OU-1 reporting activities were temporarily suspended during the spring and early summer of 2008. Groundwater sampling continued during that period, however, and normal reporting activities resumed in July 2008. The 2007 groundwater monitoring results were included in the 2008 First Quarter Groundwater Monitoring Report and in all subsequent OU-1 groundwater monitoring reports. This approach provided the regulatory agencies and the public with the latest available data in a timely manner as sampling events were completed. Consequently, this submittal provides more detail on the project activities performed during 2007, but the information presented on remediation performance and plume extent has been superseded by subsequent events. The report was reviewed by DTSC's staff. Any comments provided will be addressed in subsequent or the annual groundwater monitoring report.

Completed Document Type: Technical Report
Completed Date: 08/26/2013
Comments: The need for soil gas investigation was identified in the Third Five Year Review completed for the former Fort Ord due to the presence of occupied structures overlaying contaminated groundwater. An initial soil gas investigation was conducted at Site 12 portion of the Site in October 2012 and a subsequent soil gas investigation was conducted in April 2013. This Soil Gas Investigation Report describes the soil gas sampling activities, sample collection methodologies, and presents sample analyses and results from the soil gas investigation conducted in October 2012 and April 2013 at Sites 2 and 12.

Completed Area Name: SITE 2/12
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 06/25/2013
Comments: This Soil Gas Investigation Work Plan Addendum No. 2 Phase 1B Cinema report (Addendum No. 2) proposes the second iteration of additional soil gas samples to be collected at Sites 2 and 12 (2/12), part of the former Fort Ord located in Monterey County, California (Site). The initial soil gas investigation was conducted in October 2012 and the first iteration of additional soil gas investigation was conducted in April 2013. This work will consist of installing four soil borings and 28 soil gas probes and collecting soil and soil gas samples in the area of a proposed cinema south of an existing retail development (Figures 1 and 2). This Addendum No. 2 proposed work is expedited to accommodate the anticipated construction of the cinema beginning in August 2013. The data collected during this second iteration soil gas sampling activity will be used to evaluate the presence of volatile organic compounds (VOCs) in soil gas and determine whether there is a significant threat or an unacceptable cumulative risk of vapor intrusion to future cinema workers. DTSC staff reviewed the final document to ensure comments provided on the draft were incorporated.

Completed Area Name: Munitions Response Sites Track 3
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 08/24/2017
Comments: The Field Evaluation Workplan for Units 13, 17, and 20 will be used to further evaluate the units prior to conducting the remedial action described in the ROD. There are safety concerns regarding burning in the steep terrain and the difficulty in providing adequate fire breaks.

Completed Area Name: RANGES 43-48, OE-16, RANGE 30A
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision
Completed Date: 09/26/2002
Comments: ROD - IA - This Interim Action ROD addresses sites (Ranges 43- 48, OE-16 and Range 30a) at the Former Fort Ord that contain live, sensitively fused surface Ordnance and Explosives (OE) items in close proximity to residential neighborhoods and schools. The Interim Action cleanup to address risks from OE at these sites includes three components: 1) Vegetation Clearance, 2) OE detection and removal, and 3) OE detonation. The ROD has determined that the Interim Action is appropriate to protect human health from the imminent threat posed by the OE at the three sites.

Completed Document Type: Feasibility Study Report
Completed Date: 06/17/2002
Comments: RIFS - IA -- The Interim Action RIFS was prepared to address Ordnance and Explosives (OE) in specific areas of the former Fort Ord in order to take quick action to protect human health and the environment from an imminent threat. The preferred alternative includes buring the vegetation to clear the land for OE removal, and on-site detonation with engineering control

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Feasibility Study Report
Completed Date: 06/30/2004
Comments: RA - DRO -- The Army conducted an Ordnance and Explosives (OE) removal action on 300 acres to facilitate transfer of the parcel to City of Del Rey Oaks. City of Del Rey Oaks is planning on transforming the area into a Golf Course resort. The removal action consisted of conducting geophysical investigation of all anomalies and excavating and removing all OE items found. The Army met it's objective of the removal action in clearing the parcel of all OE except for certain identified areas. These uncleared areas will be cleared under a separate removal action.

Completed Area Name: Munitions Response Sites Track 0
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision
Completed Date: 06/25/2002
Comments: DTSC concurred on the Track 0 ROD (ROD - TR0). This ROD determined that approximately 120 parcels, totaling 2,100 acres, contain no evidence of Ordnance and Explosives (OE), and these areas have never been used for OE related activities of any kind.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: SITE 16/17
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/03/1999
Comments: Not reported

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: YORK SCHOOL
Completed Document Type: Removal Action Completion Report
Completed Date: 05/30/2001
Comments: RA - YORK -- The army conducted an Ordnance and Explosives (OE) removal action on 30 acres to facilitate leasing of the Area to York School. York is a private parochial school for high school age children. The removal action consisted of conducting geophysical investigation of all anomalies and excavating and removing all OE items found. The Geophysical investigation used two different types of instruments to sweep over the same area.

Completed Area Name: OU2
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 02/28/2001
Comments: OU2 Landfill Operations and Maintenance Plan. This Operations and Maintenance Plan provides the post-closure inspection, monitoring and maintenance procedures for the closed Operable Unit 2 (OU2) landfill.

Final closure was completed in accordance with the Record of Decision for OU2.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: WATER AND WASTEWATER SYSTEMS
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 09/09/1998
Comments: FOST - WWSYS -- Concurred with FOST for 4.16 acres to be reused for water and waste water storage and distribution purposes. Concurrence based on no action DTSC letter dated 8/18/98.

Completed Area Name: SURPLUS 2 PARCEL
Completed Sub Area Name: AREA B
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 10/15/1998
Comments: Not reported

Completed Area Name: SURPLUS 2 PARCEL
Completed Sub Area Name: AREA A
Completed Document Type: Finding of Suitability to Transfer
Completed Date: 03/19/1999
Comments: FOST - SUR2A - Concurred with FOST for Surplus 2 Parcel (Area A) for approximately 8 acres to be reused as a road and gas station. Concurrence is based on DTSC NFA letter dated 10/13/98. FOST - SUR2B - Concurred with FOST for Surplus 2 Parcel (Area B), 184 acres to be reused for recreational, educational, and administrative purposes. Concurrence based on DTSC NFA letter dated 10/13/98.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: IA 2
Completed Document Type: Remedial Action Completion Report
Completed Date: 07/23/1998
Comments: RMDL - IA2 -- Three sites meeting the criteria of Interim Action Sites under the Fort Ord Interim Action ROD were remediated. Contaminated soil was excavated at each site and placed in the OU-2 landfill. Ground water was not affected.

Completed Area Name: Munitions Response Sites Track 1
Completed Sub Area Name: BEACH AREAS
Completed Document Type: Land Use Restriction
Completed Date: 02/24/2009
Comments: The restrictions from this Land Use Covenant are for 858 acres of Parcel S3.1.1. Soil on the property contains lead, including "lead bullet slugs". The following activities are prohibited on the property: (a) residential use; (b) A public or private school for persons under the age of 21; (c) hospital; (d) A day care center for children; (e) campgrounds. This list is not to be considered all inclusive, please see uploaded LUC for additional details.

Background Info: The U.S. Army established Fort Ord in 1917; its current mission is training. Fort Ord was added to the National Priority List (NPL) US EPA in February, 1990. Fort Ord is projected to be, by October 1997, under BRAC II. Industrial operations and practices associated with supporting its training operations may have contributed to the contamination found on the base. Thirty-nine individual study sites have been identified for possible inclusion into the RI/FS. No data exists for 29 of these sites (railroad right of way, maintenance yards, motor pools, former dump sites, golf course, fueling facilities and sewage treatment plant). A site characterization study will be done. Five sites (two sewage treatment plants, fire training burn pit, dump site/cannibalization yard/automotive yard, and Inland train fire range) have been identified as requiring a remedial investigation, and one site (sewage pump station) has been determined to need no further investigation. An inland training range will require a history review, the former DRMO will need a risk screening evaluation, the AAFES dry cleaner will await results from an underground tank removal. At the Inland impact areas, research will be done to assess the need for and scope of investigation. Possible pathways of contamination include wind dispersion, surface water run-off, and groundwater transport. Possible receptors include human or animal exposure via direct contact with contaminated soil or water. A Federal Facilities Agreement (FFA) was signed on July 23, 1990 by the US Army, EPA, RWQCB, and DHS. The FFA was binding upon all parties through site certification, operation and maintenance. The FFA is considered final after the public comment period, which ended in November, 1990. Due to the size and complexity of the Fort Ord Army Base, this facility has been divided into the following separate sites: Main Base, Fritzsche Army Airfield Fire Drill Area, and the Landfill Areas. As the RI/FS is implemented, additional sites may be identified. OU3 consists of those areas at the facility chemical impacts significant enough to require full remedial investigation and feasibility studies. These sites are combined under one ROD and will be remediated at the same time. OU2; MARINA WELL #9 -historically, this OU was referenced as the landfill areas. Three inactive landfill areas of about 100 acres in total were used during the past 30 - 35 years for residential and commercial waste disposal. The main landfill operated from the mid-1950s to May 31, 1987. The Army did not maintain detailed records of the amount and type of waste disposed at the landfill. The other two landfills are either covered with sparse vegetation or Army base residential developments. The landfills are currently being monitored and investigations are ongoing. OU1; MARINA WELL #9 - historically, this OU is referenced as the Fritzsche Army Airfield drill area and is located on the north end of the Fort Ord facility, just west of the runway and administrative areas of Fritzsche Airfield. The fire drill area was used for approximately 20 years. Fuels, solvents, thinners and similar compounds are suspected of being used at the site for fire drill activities. OU1: On June 26, 1984, approximately 600 gallons of waste helicopter fuel (JP-4), was spilled onto the ground at the site. Water supply wells are located within 1/4 mile from the discharge point. On July 6, 1984, the Regional Water Quality Control Board issued

ued a Cleanup and Abatement Order directing that an investiga- ti
on and remedial action plan be carried out to remediate the site.
OU1: Remediation of the site began in August, 1988 and is cont
inuing. The primary objective of the program is to: prevent conta
minated groundwater in the uppermost aquifer from migrating off-s
ite or into the deeper aquifer systems, which may be used for wat
er supply; remove chemicals found in the groundwater in****

Comments: ROD (OU2) DTSC approved the Record of Decision for OU2 (formerly
Comments Date: 06301994
Comments: referred to as the Landfill Areas). The selected remedy will involve the following activities: placement of an engineered cover system over the landfills; and extraction and treatment of VOC contaminated groundwater. Approximate cost: not available; Funding: BRAC
Comments Date: 06301994
Comments: RMDL - IA1 -- This activity includes the concurrence by DTSC with completion of remedial activities consistent with the Interim Action Record of Decision and determination of No Action consistent with the No Action Record of Decision. The Interim Action sites consist of: Sites 14, 15, 20, 22, 24, 36, 40 and outfalls 34/35.
Comments Date: 06301998
Comments: The No Action sites consist of: Sites 11, 13, 18, 19, 23, 26, 27, 28, 29, 35 AND 37.
Comments Date: 06301998
Comments: RIFS - TRK1 -- No further action proposed for 21 possible ordnance sites. Army performed literature search and investigation on these sites and proposes no further action. At some sites, additional safeguard measures are proposed. RMDL - S2/12 -- DTSC concurs with the Army that this groundwater pump and treat system is operating according to the remedy selected in the Basewide Remedial Action Sites Record of Decision (ROD).
Comments Date: 07061994
Comments: OU2 - Historically, this OU was referenced as the Landfill Areas.
Comments Date: 07231998
Comments: RMDL - IA2 -- Three sites meeting the criteria of Interim Action Sites under the Fort Ord Interim Action ROD were remediated. Contaminated soil was excavated at each site and placed in the OU-2 Landfill. Ground water was not affected.
Comments Date: 07251991

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment/Site Inspection Report (PA/SI)
Completed Date: 08/17/1990
Comments: Completed PA. Additional site characterization was performed by Harding Lawson and Associates as part of the Environmental Site Assessment, dated July 24, 1990. Sample results indicate lead, zinc, chromium and cadmium found in soil. Lead contaminated soil was found to be the major issue, with concentrations up to 1,736 mg/kg. Lead (296 ug/l), arsenic (2 ug/l), copper (70 ug/l), thallium (76 ug/l), zinc (423 ug/l), total petroleum hydrocarbons (waste oil 340 ug/l), benzene (2.2 ug/l) were found in water samples.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 01/23/1997
Comments: DTSC issued a letter stating no further remedial actions would be required provided the property owner complied with the land use restrictions.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 03/23/2016
Comments: The Department of Toxic Substances Control reviewed documents about the proposed improvement plan at the Site, which involves lowering of the existing sidewalk at the 13 ADA spaces by 6 inches. The documents included a February 26, 2016 letter from Bestor Engineers Inc., construction plans, and a preliminary cross section. The purpose of the review was to determine the restrictions of the Land Use Covenant that may apply to the planned worked. DTSC did not have any comments.

Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 04/20/2010
Comments: Upon inspection, the asphalt parking lot surface was observed to be in good condition. Some cracking or signs of damage was observed along the parking lot near the Del Monte Avenue. However, asphalt is in good condition and remains protective of the impacted soil. The foundation of the hotel comprises the remainder of the cap and could not be inspected; however, the hotel exterior appears to be in good condition. There was no evidence of any activities prohibited by the Deed Restriction.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment/Site Inspection Report (PA/SI)
Completed Date: 08/17/1990
Comments: Completed PA. Additional site characterization was performed by Harding Lawson and Associates as part of the Environmental Site Assessment, dated July 24, 1990. Sample results indicate lead, zinc, chromium and cadmium found in soil. Lead contaminated soil was found to be the major issue, with concentrations up to 1,736 mg/kg. Lead (296 ug/l), arsenic (2 ug/l), copper (70 ug/l), thallium (76 ug/l), zinc (423 ug/l), total petroleum hydrocarbons (waste oil 340 ug/l), benzene (2.2 ug/l) were found in water samples.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 01/23/1997
Comments: DTSC issued a letter stating no further remedial actions would be required provided the property owner complied with the land use restrictions.

Completed Document Type: Other Report
Completed Date: 03/23/2016
Comments: The Department of Toxic Substances Control reviewed documents about the proposed improvement plan at the Site, which involves lowering of the existing sidewalk at the 13 ADA spaces by 6 inches. The documents included a February 26, 2016 letter from Bestor Engineers Inc., construction plans, and a preliminary cross section. The purpose of the review was to determine the restrictions of the Land Use Covenant that may apply to the planned worked. DTSC did not have any comments.

Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 03/27/2009
Comments: Upon inspection, the asphalt parking lot surface was observed to be in good condition, with no significant cracking or signs of damage. The foundation of the hotel comprises the remainder of the cap and could not be inspected; however, the hotel exterior appears to be in good condition. There was no evidence of any activities prohibited by the Deed Restriction.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 04/20/2010
Comments: Upon inspection, the asphalt parking lot surface was observed to be in good condition. Some cracking or signs of damage was observed along the parking lot near the Del Monte Avenue. However, asphalt is in good condition and remains protective of the impacted soil. The foundation of the hotel comprises the remainder of the cap and could not be inspected; however, the hotel exterior appears to be in good condition. There was no evidence of any activities prohibited by the Deed Restriction.

Background Info: A portion of the Site was occupied by an automobile junkyard from 1959 to 1964. In 1964, junk cars, scrap, and debris were removed and a retail plumbing, electrical, and sheet metal shop and lumberyard were built in the former junkyard area. A lumber and hardware store and a furniture store once occupied the eastern and southern portions of the Site. Redevelopment plans for the site called for the construction of the Embassy Suites

Laguna Grande Seaside Hotel, a 225-room hotel tower with ancillary commercial facilities designated in the building plan totaling 59,400 square feet. The remainder of the Site was planned to be a 162,500 square foot parking lot. The Redevelopment Agency of Seaside, in a letter dated February 28, 2003, indicated that a Reciprocal Parking and Easement Agreement (Agreement), will be executed by the Redevelopment Agency of Seaside, John Q. Hammons Hotels Two, L.P., and the City of Seaside, to use the Site for additional overflow parking only for a restaurant.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description:	Vandals broke a water main that flooded the basement of abandon building. Their is old piping to a boiler that retained diesel fuel. The diesel and fuel mixed and entered the storm drain. Environmental Health employee responded and assessed the poteential impact to a waterway is minimal. Vac truck is enroute to remove substance from the storm drain. The Fire Dept. estimated the amount of diesel to be approximately 35 gallons.

Lead Agency: Not reported
Case Worker: Not reported
Local Agency: MONTEREY COUNTY
RB Case Number: 2716
Loc Case Number: Not reported
File Location: Regional Board
Potential Contaminants of Concern: Diesel
Potential Media Affected: Soil
Site History: According to the Underground Storage Tank (UST) Removal Report dated September 28, 1995, one 1,000-gal fiberglass UST containing diesel fuel was removed from the Fort Ord motor pool area on July 7, 1995. US Army Corps of Engineers contracted GEOFON/GARZA Joint Venture to remove the UST and collect two soil samples: one sample from beneath the UST itself and another sample beneath the UST piping. Monterey County Environmental Health permitted the tank removal and oversaw soil sampling. The soil samples collected below the USTs contained non-detectable concentrations of total petroleum hydrocarbons as diesel (TPH-d). Benzene, toluene, ethylbenzene, and total xylenes (BTEX) were not detected above detection limits. GEOFON/GARZA also collected one soil sample from the stockpile, which contained 900 mg/kg TPH-d and no-detectable concentrations of BTEX. The stockpiled soil was removed from the site and taken to a landfill for disposal. Monterey County Environmental Health staff oversaw the UST removal and may have information in their records showing this agency closed the case.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

1009632288

Hazardous Liquid 2002 - 2009:

Incident Yr: 2005
Operator ID: 19237
Owner Operator ID: Not reported
Name: "TE PRODUCT PIPELINE CO., LLP"
Operator Address: 2929 ALLEN PARKWAY
Operator City: HOUSTON
Operator County: HARRIS
Operator State: TX
Operator Zip: 77019
Incident Date: 1/15/2005
Commodity Spilled: YES
Commodity Spilled Desc: GASOLINE U/L REG
Est. Amt. Commodity Invl Desc: BARRELS
Amount Spilled: 2
Amount Recovered: 2
Leak or Rupture Type Desc: Not reported
Narrative: Not reported

Natural Gas Distribution 2004 - 2009:

Incident Yr: 2004
Operator ID: 15007
Operator Name: PACIFIC GAS & ELECTRIC COMPANY
Operator Address: PO BOX 770000 MAIL CODE H15E
Operator City: SAN FRANCISCO
Operator County: SAN FRANCISCO
Operator State: CA
Operator Zip: 94177
Incident Date: 2004-12-23 00:00:00
Leak or Rupture Type Desc: LEAK
Narrative: CAR STRUCK AN ELECTRIC POLE IN SEASIDE, CA @ 0853 CAUSING ELECTRIC OUTAGE. PG&E EMPLOYEES ATTEMPTED SWITCHING OPERATIONS AT THE SEASIDE SUBSTATION TO RESTORE POWER. A SWITCHING EQUIPMENT FAILURE CAUSED A GROUND FAULT TO APPLY ABNORMAL VOLTAGE TO THE GAS DISTRIBUTION SYSTEM, RESULTING IN GAS INCIDENTS AT TWO LOCATIONS THE RESIDENCE NEXT TO THE SUBSTATION (1940 SAN PABLO ST) AND A RUPTURE OF THE 2" 50 PSIG STEEL GAS MAIN A BLOCK AND A HALF AWAY (1717 HAVANA ST) THE ESCAPING GAS FROM THE GAS SERVICE AT 1940 SAN PABLO ST CONTRIBUTED TO THE SCOPE OF FIRE DAMAGE AT THAT LOCATION. THE 60 KV GROUND FAULT CAUSED THE INCIDENT AT THE SAN PABLO LOCATION. THE HAVANA STREET LOCATION OCCURRED DUE TO A CONTACT BETWEEN THE STEEL GAS MAIN AND A 3/4" COPPER WATER SERVICE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Small Quantity Generator

Hazardous Waste Summary:

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 7

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Environmental Interest/Information System
HAZARDOUS WASTE BIENNIAL REPORTER

Registry ID: 110006365860

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)
provides California with information on hazardous waste shipments for
generators, transporters, and treatment, storage, and disposal
facilities.

RCRAInfo is a national information system that supports the Resource
Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

AIR SYNTHETIC MINOR

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the

discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

17 Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste name: BENZENE

. Waste code: U154
. Waste name: METHANOL (I) (OR) METHYL ALCOHOL (I)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 8523.3

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 20

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 10

Waste code: D009
Waste name: MERCURY
Amount (Lbs): 10

Waste code: D018
Waste name: BENZENE
Amount (Lbs): 150

Waste code: U154
Waste name: METHANOL (I)
Amount (Lbs): 15

FINDS:

Focus Map:
22

Registry ID: 110070087676

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Description:	Per NRC report: "Caller is reporting a material release incident involving the responsible party spraying engine degreaser on the engine of a passenger car. Unfortunately the engine was later sprayed with a garden hose causing the engine degreaser to spill onto the street. Responsible party apparently didn't read the back of the can to follow proper instructions. The material reached a nearby gutter and eventually got into the storm drain." REMEDIAL ACTIONS: "Vac truck used, property disposing the material at the Monterey Regional Water Pollution Control Agency, clean up completed." ADDITIONAL INFORMATION: "Health Dept, Fish & Game, Public Works, and USCG were all notified. No sheen information."

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

Case Worker: Not reported
Local Agency: MONTEREY COUNTY
RB Case Number: 1014
Loc Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Contaminants of Concern: Gasoline
Potential Media Affected: Other Groundwater (uses other than drinking water)
Site History: According to EA Engineering, Science, and Technology's (EA EST) Final Site Investigation Report dated February 1990, the former motor pool consisted of three 5,000-gal USTs contained diesel and one 5,000-gal UST thought to contain leaded gasoline. The former fueling station was shut down in 1974. The motor pool also consisted of one waste oil UST and an oil-water separator located near Building 4537. Drums of waste oil and other materials were previously stored along the southern boundary of the motor pool site. EA EST drilled 11 borings to evaluate the potential release of petroleum products and solvents

and converted three of the borings into monitoring wells. Monterey County Environmental Health staff oversaw the tank removal, soil sampling, and monitoring well installation and sampling. The maximum concentration of total recoverable petroleum hydrocarbons (TRPH) was in sediment of the drainage channel down-gradient of the site (6,900 mg/Kg SB). TRPH and other petroleum compounds were below laboratory detection limits in the three groundwater monitoring wells associated with the 14th Motor Pool. See Study Zone 8 in the Draft Final Base-wide Remedial Investigation/Feasibility Study report for more detailed information.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

WDS:

Facility ID: Central Coastal 270604211
Facility Type: Municipal/Domestic - Facility that treats sewage or a mixture of predominantly sewage and other waste from districts, municipalities, communities, hospitals, schools, and publicly or privately owned systems (excluding individual subsurface leaching systems disposing of less than 1,000 gallons per day).
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAG993001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 3
Facility Telephone: 8313723367
Facility Contact: DANIEL MIZERSKI
Agency Name: MONTEREY REGIONAL WPCA
Agency Address: 5 HARRIS CT BLDG D
Agency City,St,Zip: MONTEREY 93940
Agency Contact: KEITH ISRAEL MANAGER
Agency Telephone: 8318831118
Agency Type: Government Agency Combination (City-County, County-State, etc.)
SIC Code: 4953
SIC Code 2: Not reported
Primary Waste Type: Not reported
Primary Waste: Not reported
Waste Type2: Not reported
Waste2: Not reported
Primary Waste Type: Not reported
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-02-2011
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Industry in substantial compliance. Improvements noted in the biosolids handling and compost area to reduce/eliminate stormwater runoff potentially affecting groundwaer at monitoring well G-32.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-16-2013
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Industry in substantial compliance. Wet weather preparations were completed and in excellent conditions within landfill facility. Major improvements completed for fueling area, waste oil storage areas, and vehicle/heavy equipment maintenances area. Hazardous waste handling area has substantial improvements to overall operations and storage of materials. ==>Food composting pilot operation will need a wet weather inspection for runoff controls.

UORS (California - Used Oil Recycling System). California Integrated Waste Management Board (CIWMB) helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

GREENHOUSE GAS REPORTER

US EPA RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "Best Available" air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.

Lead Agency: CENTRAL COAST RWQCB (REGION 3)
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0605354763
Global Id: T0605354763
Latitude: 36.694598
Longitude: -121.799947
Status: Completed - Case Closed
Status Date: 10/26/2009
Case Worker: WNL
RB Case Number: 3522
Local Agency: MONTEREY COUNTY
File Location: Regional Board
Local Case Number: Not reported
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History:

Based on the soil investigation, groundwater monitoring, and cleanup results, Central Coast Water Board staff believes there is no significant threat to groundwater resources, human health or the environment from this site. Petroleum hydrocarbon concentration trends are downward, and remaining residual soil and groundwater contamination are well characterized and contracting or declining in size and concentration. The contaminant mass has been removed from the site to the maximum extent practicable, and historical monitoring data indicate contaminant concentrations in groundwater will likely decrease to below cleanup goals in a reasonable time. The Monterey County Health Department (MCHD) agrees with our proposed closure of the case. Residual soil and groundwater contamination still underlies the site that could pose an unacceptable risk under certain site redevelopment activities such as site grading, excavation, or de-watering. The Central Coast Water Board, MCHD and the appropriate local planning and building departments must be notified prior to any changes in land use, grading activities, excavation, or dewatering. This notification should include a statement that residual soil and groundwater contamination underlie the property and may underlie nearby properties, and a description of the mitigation actions necessary (if any) to ensure that any possibly contaminated soil or groundwater brought to the surface by these activities are managed appropriately. Future site disturbance could require worker health and safety protection, and restrictions on the disposal of soil and groundwater. The levels of residual contamination and any associated risks are expected to diminish with time. The MCHD may require additional site assessment if the property is proposed to be redeveloped. Additional actions required by MCHD may include, but not limited to, a case review, further remedial action, soil gas analysis, and a human health risk assessment.

CERS TANKS:

Facility Name: 7-ELEVEN INC #32415
Site ID: 1253
CERS ID: 10166035
CERS Description: Underground Storage Tank

Violations:

Site ID: 1253
Site Name: 7-ELEVEN INC #32415
Violation Date: 02-23-2017
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665

Violation Description: Failure of the overflow prevention system to meet one of the following requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violation Notes: Tank 1
Violation Division: Monterey County Health Department
Violation Program: UST

CERS Description: US EPA Air Emission Inventory System (EIS)

Violations:

Site ID: 1253
Site Name: 7-ELEVEN INC #32415
Violation Date: 02-23-2017
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665

Violation Description: Failure of the overfill prevention system to meet one of the following requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FORT ORD REUSE AUTHORITY (EARLY TRANSFER) (Continued)

S109548270

Comments: All meetings for the 2016-17 fiscal year were completed

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 05/08/2009
Comments: The parcels contained in this LUC have been transferred to the Fort Ord Reuse Authority, and were approved for early transfer by the Governor. The LUC was recorded on May 8th, 2009 and applies to approximately 546.529 acres. This LUC stipulates the only use of the property is to be for the investigation and remediation of MEC. In addition the LUC prohibits residential and other sensitive uses, and requires adherence to the AOC and the Digging and Excavation on the Former Fort Ord Ordinance (Chapter 16.10 of the Monterey County Code), which regulates digging in areas suspected of containing munitions and explosives of concern.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 04/18/2007
Comments: The Administrative Order on Consent (AOC) is a voluntary agreement entered into by the US EPA, DTSC and the Fort Ord Reuse Authority (FORA). The AOC concerns the preparation and performance of potential removal actions, one or more remedial investigations and feasibility studies (RI/FS) and one or more remedial designs and remedial actions (RD/RA) for contaminants present on portions of the former Fort Ord and the reimbursement for future response costs incurred by US EPA and DTSC in connection with such CERCLA response actions.

Completed Area Name: Group 2
Completed Sub Area Name: CSUMB Off-Campus and County North MRA's
Completed Document Type: Remedial Investigation Workplan
Completed Date: 10/15/2009
Comments: RI/FS report will be issued after the Track 1 Approval Memorandum for County North Response Area is completed.

Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 05/08/2009
Comments: The parcels contained in this LUC have been transferred to the Fort Ord Reuse Authority, and were approved for early transfer by the Governor. The LUC was recorded on May 8th, 2009 and applies to approximately 1767.356 acres. This LUC stipulates the only use of the property is to be for the investigation and remediation of MEC. In addition the LUC prohibits residential and other sensitive uses, and requires adherence to the AOC and the Digging and Excavation on the Former Fort Ord Ordinance (Chapter 16.10 of the Monterey County Code), which regulates digging in areas suspected of containing munitions and explosives of concern.

Completed Area Name: Sites With No Operable Unit
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 05/08/2009
Comments: The parcels contained in this LUC have been transferred to the Fort Ord Reuse Authority, and were approved for early transfer by the Governor. The LUC was recorded on May 8th, 2009 and applies to approximately 332.839 acres. Remedial investigations have identified contaminate plumes in the groundwater underlying the Former Fort Ord, these plumes are undergoing remediation and this covenant puts restrictions on the creation of groundwater recharge areas, prohibits the installation of groundwater wells and the extraction of groundwater. In addition the LUC requires adherence to the Monterey County Ordinance No.04011 which prohibits the construction of wells within a prohibition zone outlined within the ordinance (Chapter 15.08 of the Monterey County Code).

Completed Area Name: Sites With No Operable Unit
