Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 571

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 35

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 46

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 92

Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 36

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER

UORS (California - Used Oil Recycling System). California Integrated Waste Management Board (CIWMB) helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

Environmental Interest/Information System
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Site History:

This site designation is made to receive reports and data covering several sites or operable units within the former Ft. Ord. Any information pertaining to one specific site should be uploaded to that site's individual site listing in Geotracker. Fort Ord and BRAC History: Beginning with its founding in 1917, Fort Ord served primarily as a training and staging facility for infantry troops. From 1947 to 1975, Fort Ord was a basic training center. After 1975, the 7th Infantry Division occupied Fort Ord. Light infantry troops operated without heavy tanks, armor, or artillery. Fort Ord was selected in 1991 for decommissioning, but troop reassignment was not completed until 1994, when the post formally closed. Although Army personnel still operate parts of the base, no active Army division is stationed at Fort Ord. In 1917, the US Army bought the present day East Garrison and nearby lands on the east side of Fort Ord to use as a maneuver and training ground for field artillery and cavalry troops stationed at the Presidio of Monterey. Before the Army's use of the property, the area was agricultural, as is much of the surrounding land today. No permanent improvements were made until the late 1930s, when administrative buildings, barracks, mess halls, tent pads, and a sewage treatment plant were constructed. In 1938, additional agricultural property was purchased for the development of the Main Garrison. At the same time, the beachfront property was donated to the Army. The Main Garrison was constructed between 1940 and the 1960s, starting in the northwest corner of the base and expanding southward and eastward. During the 1940s and 1950s, a small airfield within the Main Garrison was present in what is now the South Parade Ground. In the early 1960s, Fritzsche Army Airfield was completed. The Main Garrison airfield was then decommissioned and its facilities were redeveloped as motor pools and other facilities. Over its history, the post was home to a succession of infantry divisions and served as a center for basic and advanced training. In 1975, the post became the home to the 7th Infantry Division, which conducted training exercises on the installation. Base Realignment and Closure

Commission (BRAC): The 1991 Defense Base Realignment and Closure Commission recommended Fort Ord be closed and troops of the 7th Infantry Division be relocated to Fort Lewis, Washington. As part of that action, the Army prepared several documents that identify future land uses for Fort Ord following closure. The reference document section of this web site identifies the principal sources of information and documents prepared by the Army under the BRAC action. The Administrative Record (i.e. all documents related to the cleanup) is located at:

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: The site is an operating service station with three 10,000-gallon underground storage tanks. Land use in the immediate vicinity of the site is predominantly commercial, with interspersed residential developments. Lock Paddon Park is located approximately 500 feet north of the site. Three groundwater monitoring wells were installed at the site in February and May 1988. An un-measurable sheen was

S101299043

observed prior to developing well MW-1. Elevated concentrations of total Petroleum Hydrocarbons as gasoline (TPHg) and benzene were detected in selected soil samples collected from MW-1. Groundwater monitoring has been performed since 1992 on the three existing monitoring wells. MTBE was added to the monitoring program in 1996. Based on the available soil and groundwater data, impacts to soil and groundwater appear to be limited to the area to the northwest of the tank pit, surrounding monitoring well MW-1. A Corrective Action Plan (CAP) was submitted in April 2008 and has been implemented since June 2008. An iSOC unit has been installed in well MW-1. Significant decrease of petroleum hydrocarbon concentrations has occurred since the system operation.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Deed/LUR Enforcement & Implementation Plan
Completed Date: 07/15/2008
Comments: Finalized on February 27, 2008. This agreement among FORA, the Cities, the County and DTSC, addresses monitoring and reporting on environmental restrictions at the Former Fort Ord. Jurisdictions must monitor compliance with all LUCs and submit data in a report to DTSC. This agreement also provides funding for DTSC's review and oversight costs relating to the MOA and LUCs.

CERS Description: Hazardous Waste Generator

Violations:

Site ID: 55977
Site Name: PEMCON INC
Violation Date: 05-31-2017
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Not reported
Violation Division: Monterey County Health Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 55977
Site Name: PEMCON INC
Violation Date: 06-30-2016
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: CCR title 19 2658 C - Black pail of unknown in Flammable cabinet. The only label on the container is "Flammable". Identify the contents of the container and label it. The cylinder storage area is chained but is ineffective to mitigate some of the cylinders from falling. Adjust cylinder security so cylinders are unable to fall.

FINDS:

Registry ID: 110002830848

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

NAVAL AUXILIARY AIR STATION MONTEREY (Continued)

1007212013

NPL Status: Not Listed
Description: The site is located in Monterey County, California. After Department of Defense occupancy terminated, the property reverted back to the Monterey Peninsula Airport District who currently owns the site today. The site has continuously been used as a municipal airport. Before being declared a FUD Site, two underground storage tanks (USTs) were removed and disposed of by the Monterey Peninsula Airport District. Groundwater monitoring wells have been installed on- and off-site to determine the impact of POL and TCE contamination.
History: The Navy leased the land in 1942 from the Monterey Peninsula Airport District (MPAD). The Naval Auxiliary Air Station (NAAS) was commissioned from the mid-1940s until March 1972 for use as an operable air station to support, operate and maintain aircrafts as well as train personnel during World War II. In 1946, full military use of the airport was determined to be excess, so joint and equal use of the landing facility was granted to the MPAD. The Navy maintained exclusive use of the aprons, hangar, repair shops, and storage tanks. In March 1972, the original lease agreement was terminated. On 22 November 1983, in exchange for restoration payment of \$8,850, the MPAD released the Navy from its lease. After the removal of several underground storage tanks (USTs), Petroleum, Oils & Lubricants (POL) and Trichloroethene (TCE) contamination were identified within the soil and groundwater.
CTC: 18860.5
Current Program: Operations of treatability study to treat groundwater contaminated with POL and TCE. Performance of air permeability tests to determine if soil vapor extraction is a viable alternative to pump and treat.N/A
Future Program: Completion of treatability studies with closure of POL monitoring as POL can be closed out using the low-threat closure process in California. Continued groundwater monitoring along with additional air perm testing.N/A

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Worker: WNL
RB Case Number: 3676
Local Agency: MONTEREY COUNTY
File Location: Not reported
Local Case Number: Not reported
Potential Media Affect: Under Investigation
Potential Contaminants of Concern: Gasoline, Diesel
Site History: Low concentrations of (primarily) TPH-d were detected in soil and gw during a due deligency site investigation. Following a Phase II site investigation, five gw monitoring wells were installed to confirm whether soil and gw at the site has been impacted. Based on the soil investigation, groundwater monitoring, and cleanup results, Central Coast Water Board staff believes there is no significant threat to groundwater resources, human health or the environment from this site. Petroleum hydrocarbon concentration trends are downward, and remaining residual soil and groundwater contamination are well characterized and contracting or declining in size and concentration. The contaminant mass has been removed from the site to the maximum extent practicable, and historical monitoring data indicate contaminant concentrations in groundwater will likely decrease to below cleanup goals in a reasonable time. The Monterey County Health Department (MCHD) agrees with our proposed closure of the case. Residual soil and groundwater contamination still underlies the site that could pose an unacceptable risk under certain site redevelopment activities such as site grading, excavation, or de-watering. The Central Coast Water Board, MCHD and the appropriate local planning and building departments must be notified prior to any changes in land use, grading activities, excavation, or dewatering. This notification should include a statement that residual soil and groundwater contamination underlie the property and may underlie nearby properties, and a description of the mitigation actions necessary (if any) to ensure that any possibly contaminated soil or groundwater brought to the surface by these activities are managed appropriately. Future site disturbance could require worker health and safety protection, and restrictions on the disposal of soil and groundwater. The levels of residual contamination and any associated risks are expected to diminish with time. The MCHD may require additional site assessment if the property is proposed to be redeveloped. Additional actions required by MCHD may include, but not limited to, a case review, further remedial action, soil gas analysis, and a human health risk assessment.

Case Worker: WNL
RB Case Number: 3677
Local Agency: MONTEREY COUNTY
File Location: Not reported
Local Case Number: Not reported
Potential Media Affect: Under Investigation
Potential Contaminants of Concern: Diesel
Site History: Low concentrations of TPH-d and metals were detected in soil and groundwater during a due deligency site assessment in 2007. Four groundwater monitoring wells were installed in 2008 as Water Board requested. Based on the soil investigation, groundwater monitoring, and cleanup results, Central Coast Water Board staff believes there is no significant threat to groundwater resources, human health or the environment from this site. Petroleum hydrocarbon concentration trends are downward, and remaining residual soil and groundwater contamination are well characterized and contracting or declining in size and concentration. The contaminant mass has been removed from the site to the maximum extent practicable, and historical monitoring data indicate contaminant concentrations in groundwater will likely decrease to below cleanup goals in a reasonable time. The Monterey County Health Department (MCHD) agrees with our proposed closure of the case. Residual soil and groundwater contamination still underlies the site that could pose an unacceptable risk under certain site redevelopment activities such as site grading, excavation, or de-watering. The Central Coast Water Board, MCHD and the appropriate local planning and building departments must be notified prior to any changes in land use, grading activities, excavation, or dewatering. This notification should include a statement that residual soil and groundwater contamination underlie the property and may underlie nearby properties, and a description of the mitigation actions necessary (if any) to ensure that any possibly contaminated soil or groundwater brought to the surface by these activities are managed appropriately. Future site disturbance could require worker health and safety protection, and restrictions on the disposal of soil and groundwater. The levels of residual contamination and any associated risks are expected to diminish with time. The MCHD may require additional site assessment if the property is proposed to be redeveloped. Additional actions required by MCHD may include, but not limited to, a case review, further remedial action, soil gas analysis, and a human health risk assessment.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002652950

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS ID: 10433803
CERS Description: Hazardous Waste Generator

Violations:

Site ID: 397799
Site Name: MONTEREY CITY DISPOSAL INC
Violation Date: 02-27-2017
Citation: 23 CCR 16 2637 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637

Violation Description: Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test within six months of installation and every 36 months thereafter. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician or a licensed tank tester.

Site ID: 397799
CERS ID: 10433803
CERS Description: Underground Storage Tank

Violations:
Site ID: 397799
Site Name: MONTEREY CITY DISPOSAL INC
Violation Date: 02-27-2017
Citation: 23 CCR 16 2637 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637
Violation Description: Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test within six months of installation and every 36 months thereafter. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician or a licensed tank tester.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/11/2019	Source: EPA
Date Data Arrived at EDR: 04/18/2019	Telephone: N/A
Date Made Active in Reports: 05/14/2019	Last EDR Contact: 06/06/2019
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/15/2019
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019	Source: EPA
Date Data Arrived at EDR: 04/18/2019	Telephone: N/A

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/11/2019	Source: EPA
Date Data Arrived at EDR: 04/18/2019	Telephone: N/A
Date Made Active in Reports: 05/14/2019	Last EDR Contact: 06/06/2019
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/15/2019
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/05/2019	Telephone: 703-603-8704
Date Made Active in Reports: 05/14/2019	Last EDR Contact: 04/05/2019
Number of Days to Update: 39	Next Scheduled EDR Contact: 07/15/2019
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/11/2019	Source: EPA
Date Data Arrived at EDR: 04/18/2019	Telephone: 800-424-9346
Date Made Active in Reports: 05/23/2019	Last EDR Contact: 06/06/2019
Number of Days to Update: 35	Next Scheduled EDR Contact: 07/29/2019
	Data Release Frequency: Quarterly

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/31/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/04/2019	Telephone: 703-603-0695
Date Made Active in Reports: 03/08/2019	Last EDR Contact: 05/29/2019
Number of Days to Update: 32	Next Scheduled EDR Contact: 09/09/2019
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/31/2019	Source: Environmental Protection Agency

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent NPL

CA RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 01/28/2019	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 01/29/2019	Telephone: 916-323-3400
Date Made Active in Reports: 03/05/2019	Last EDR Contact: 04/30/2019
Number of Days to Update: 35	Next Scheduled EDR Contact: 08/12/2019
	Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

CA DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

CA HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

CA WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CA CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Mitigation Monitoring and Reporting Program

CEQA requires that a reporting or monitoring program be adopted for the conditions of project approval that are necessary to mitigate or avoid significant effects on the environment (Public Resources Code 21081.6). This mitigation monitoring and reporting program is intended to track and ensure compliance with adopted mitigation measures during the project implementation phase. For each mitigation measure recommended in the Final Environmental Impact Report (Final EIR), specifications are made herein that identify the action required, the monitoring that must occur, and the agency or department responsible for oversight. In this MMRP, implementing entity refers to the agency that would execute the mitigation measure, which may be TAMC or any of the applicable jurisdictions depending on the agency implementing or operating the Trail segment.

Transportation Agency for Monterey County
Fort Ord Regional Trail and Greenway

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
Aesthetics							
AES-1: Design Structures to be Visually Unobtrusive							
For all FORTAG overcrossings and undercrossings, structural design shall be compatible with the surrounding landscape. Overcrossings shall be designed with visual permeability to the extent feasible. Openings shall provide viewing to frame the viewshed. Materials used shall be visually light, with natural-appearing materials and earth-toned colors compatible with the viewshed. Undercrossing entrances and exits shall include materials with textures and forms that relate to the immediate surroundings. Where feasible, install hardscaping that is of natural materials, landscaping that is compatible with the local natural plant palette, or other design features that soften the entrances and exits as they transition into and out of sloped areas. Surfaces shall be graffiti-resistant and readily repaired from graffiti. Specific design features shall be included in the final plan set and subject to implementing entity review and approval, prior to the initiation of construction. The implementing entity for any segment containing an overcrossing or undercrossing shall review the design plans for these structures to ensure they meet these requirements prior to issuance of building permits.	Incorporate visually unobtrusive design elements into plans for all overcrossings and undercrossings. Review plans to ensure they meet these requirements.	Prior to issuance of building permits	Once	Implementing entity			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
AES-3: Amenity Design							
Trail amenities such as kiosks, shade structures, and other ancillary structures shall be designed to be compatible with the natural environment or surrounding community character. Reflective and glare-producing materials shall be prohibited, and muted finishes encouraged. The color and texture of armoring materials shall be visually compatible with the appearance of the surrounding area. These design features shall be included in the final plan set prior to the initiation of construction for each Trail segment, and shall be approved by the implementing entity prior to permit approval.	Design amenities to be compatible with the natural environment. Revise final plan set to ensure compliance.	Prior to permit approval	Once	Implementing entity			
AES-4: Install Dark Sky-Compliant Lighting Prior to Operation							
The project shall employ dark sky-compliant lighting for all Trail lighting, except where the Trail crosses existing roadways and shielded safety lighting is necessary to eliminate conflict zones with vehicles. This style of lighting minimizes the release of light upwards into the atmosphere or outward past the Trail path, in part, with full cut-off luminaires.	Design trail lighting to be dark sky-compliant.	Prior to permit approval	Once	Implementing entity			
Agricultural and Forestry Resources							
AG-1: Implement Agricultural Land Conservation Measures							
Prior to issuance of grading permits for any of the Northern Marina segment alignment design options, the implementing entity shall provide that for every 1.0 acre of FMMP Important Farmland (Prime Farmland, Unique Farmland, and Farmland of Statewide Importance) that would be converted to non-agricultural use as a result of Trail development, 1.0 acre of land of comparable agricultural productivity shall be	Implement one of the farmland conversion mitigations described in the measure (one of items a, b, or c, or a combination thereof).	Prior to issuance of grading permits for any of the Northern Marina segment design options	Once	Implementing entity for Northern Marina segment

					Initial	Date	Comments
preserved in perpetuity. The 1:1 mitigation shall be satisfied through one of more of the following:							
a. Granting a perpetual conservation easement(s), deed restriction(s), or other farmland conservation mechanism(s) to Monterey County or another qualifying land management entity, ¹ such as the Ag Land Trust, for the purpose of permanently preserving agricultural land. The required easement(s) area or deed restriction(s) shall total a minimum of 0.81 acre of FMMP Important Farmland, or as determined based on final design for the design option within the study area. The land covered by said off-site easement(s) or deed restriction(s) shall be located in Monterey County.							
b. Making an in-lieu payment to a qualifying entity, such as the Ag Land Trust, to be applied toward the future purchase of a minimum of 0.81 acre of FMMP Important Farmland in Monterey County, together with an endowment amount as may be required. The payment amount shall be determined by the qualifying entity or a licensed appraiser.							
c. Making an in-lieu payment to a qualifying entity, such as the Ag Land Trust, to be applied toward a future perpetual conservation easement, deed restriction, or other farmland conservation mechanism to preserve a minimum of 0.81 acre of FMMP Important Farmland in Monterey County. The amount of the payment shall be equal to 110 percent of the amount determined by							

¹ A qualifying entity would be an incorporated land conservancy that has demonstrable ability to purchase, hold, and manage agricultural conservation easements and that possesses accreditation from the Land Trust Alliance.

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
the qualifying entity or a licensed appraiser.							
Mitigation Measure AG-1 is based on an Important Farmland conversion total that includes the currently identified design option footprint near Charles Benson Road. If the project plans are refined within the project’s study area, the acreage included in the 1:1 mitigation may be adjusted accordingly, using the same calculation methodology as used in this analysis.							
AG-4(a): Implement Measures to Reduce Construction-Related Conflicts with Agricultural Operations							
The following measures shall be implemented during construction to reduce potential conflicts between construction-related activities and agricultural operations; these measures are applicable wherever Trail construction activities occur within proximity to active agricultural operations, and shall be the responsibility of the implementing entity: <ul style="list-style-type: none">Staging for construction shall not occur in or directly adjacent to active agricultural areas and access to staging areas shall not block or inhibit access to existing farmland or farm access roadsWhere feasible, earth moving construction activities, such as grading and site preparation, within 50 feet of agricultural areas shall not occur during peak harvest periodsWhen construction activities must occur during agricultural harvest (for example, to avoid nesting bird season), reasonable access to farmland, as determined by the implementing entity in consultation with the agricultural operators, shall be maintained; while precise timing cannot be specified, the implementing entity would endeavor to	Review plans to confirm inclusion of these measures for Trail segments within proximity to agricultural operations	Prior to approval of final design plans	Once	Implementing entity			
	Conduct spot-check monitoring during construction to ensure compliance	During construction	Ongoing during construction	Implementing entity

<p>consult with the Farmers as early as feasible in the development of the construction schedule</p> <ul style="list-style-type: none"> The construction contractor shall designate a contact for construction-related complaints. Contact information shall be provided to agricultural operators within 50 feet of the Trail, and shall be posted at construction staging areas. The contractor shall respond to complaints in a timely manner <p>These measures shall be included in final design plans for FORTAG segments adjacent to agriculture and implemented by the construction contractor. The implementing entity shall review plans to confirm inclusion of these measures and conduct spot-check monitoring during construction to ensure compliance.</p>							
AG-4(b): Install Fencing and Signage Prior to Operation							
<p>Wherever the Trail is constructed within 50 feet of agricultural fields, fencing shall be installed between the Trail and adjacent agricultural operations. In addition, signs clearly indicating “No Trespassing” shall be installed at key locations near agricultural operations, to be identified by the implementing entity for Trail segments adjacent to agriculture in consultation with agricultural operators. The signs shall specify the legal ramifications for trespassing on adjacent properties. Additional signage shall be installed, where appropriate, reminding Trail users that dogs must be on leash and remain on the trail, that littering is prohibited, and that dog waste must be removed.</p> <p>The implementing entity shall be responsible for</p>	Install fencing and signage between the Trail and adjacent agricultural operations	Prior to operation	Once	Implementing entity

					Initial	Date	Comments
ensuring the fencing and signs are properly maintained and shall replace fencing and signs when they are removed or damaged such that they are no longer functional.							
AG-4(c): Regularly remove Solid Waste and Litter during Operation							
Once the Trail is open for public use, the implementing entity shall ensure that solid waste is collected from trash receptacles on a reasonable, periodic basis to ensure that the trash and recycling receptacles located along the Trail do not overflow. The frequency shall be determined by the implementing entity and may vary seasonally, with more frequent collection in the summer months when the Trail is busy. The implementing entity shall also be responsible for collecting litter along the Trail. If litter leaves the Trail ROW, the implementing entity shall ensure that the litter in the vicinity of the Trail that is reasonably attributed to Trail use is removed within a reasonable time frame. Access to agricultural fields for the purpose of litter removal shall be coordinated with on-site agricultural operators, taking into account pesticide/fumigant restrictions and the goal of minimizing soil compaction or direct contact with crops. The implementing entity shall not enter adjacent agricultural fields without express permission by the agricultural operator. All solid waste and recyclable materials shall be properly disposed.	Collect litter attributed to trail use and remove solid waste from trash receptacles on a reasonable, periodic basis	During operation	Ongoing during operation	Implementing entity for each trail segment

	Install dog waste disposal facilities consistent with the measure and maintain throughout operation.	Install prior to operation; maintain during operation	Once prior to operation; ongoing during operation	Implementing entities			
Biological Resources							
BIO-1(a) Conduct Special Status Plant Species Surveys							
Prior to issuance of grading permits for each individual segment, surveys for special status plants shall be completed in all natural vegetation communities and in undeveloped areas (including ruderal, and non-native habitats). The surveys shall be floristic in nature and shall be seasonally timed to coincide with the target species identified in the project-specific biological analysis. A reference site visit shall be conducted for the target species to confirm blooming. All plant surveys shall be conducted by a qualified biologist during the blooming season prior to any ground disturbance. All special status plant species identified shall be mapped onto a site-specific aerial photograph or topographic map with the use of Global Positioning System (GPS) unit. Surveys shall be conducted in accordance with the most current protocols established by the CDFW, USFWS, and the local jurisdictions if said	Conduct special status plant surveys for each segment during the blooming season prior to construction of that segment	Prior to issuance of grading permits for each segment	Up to three for each segment	Implementing entity and qualified botanist			
	Conduct reference site visit for target species to confirm blooming and only conduct survey if target species are in bloom	Prior to issuance of grading permits for each segment	Up to three for each segment	Implementing entity and qualified botanist			
	For each site where special status plant species occur, prepare a map indicating occurrences as “point” locations for individual plants or “area” locations for populations	Prior to issuance of grading permits for each segment	Once for each report	Implementing entity and qualified botanist

BIO-1(b): Implement Special Status Plant Species Avoidance, Minimization, and Mitigation							
Federally and/or state listed or CRPR List 1B or 2 species shall be avoided to the maximum extent possible. If federally and/or state listed or CRPR List 1B or 2 species are found during special status plant surveys [pursuant to <i>Mitigation Measure BIO-1(a)</i>], and listed species would be directly and/or indirectly impacted, or there would be a population-level impact to non-listed species, then the Trail shall be re-aligned a minimum of 50 feet within the study area to avoid impacting those plant species where and if feasible. Listed and other special status plant occurrences, or their habitats, that are not within the immediate disturbance footprint but are located within 50 feet of disturbance limits shall be demarcated as an Environmentally Sensitive Area (ESA), and shall have bright orange protective fencing installed a minimum of 50 feet beyond their extent prior to and during construction activities. Reduction of avoidance buffer distance must be approved by a qualified biologist in consultation with CDFW. No construction activity shall be allowed within these avoidance areas. To avoid encroachment within ESAs, the limits of work shall be clearly shown on all project plans and demarcated on site with high visibility fencing. Work in the vicinity of such ESAs shall be monitored by a qualified biologist to ensure no encroachment. If significant impacts to special status plants cannot be avoided, <i>Mitigation Measure BIO-1(c)</i> shall be implemented.	Realign trail as needed to avoid federally and/or state listed species	After completion of the surveys described in Mitigation Measure BIO-1(a)	Once	Implementing entity and qualified botanist			
	Demarcate ESAs for listed and special status plant or their habitats that are not within the immediate disturbance footprint but are located within 50 feet of disturbance limits	Prior to construction activities near ESAs	As needed during construction	Implementing entity and qualified botanist			
	If trail realignment or ESA demarcation is necessary, clearly indicate the realignment and/or ESAs on project plans	Prior to permit approval	Once	Implementing entity and qualified botanist			
	Conduct biological monitoring during work in the vicinity of ESAs	During construction	As needed during construction	Implementing entity and qualified botanist

BIO-1(c): Prepare Habitat Mitigation and Monitoring Plan							
If federally and/or state listed plants or non-listed special status plant populations [or sensitive natural communities or waters of the U.S. and/or State; see <i>Mitigation Measures BIO-2(b)</i> and <i>BIO-3(b)</i> , respectively] cannot be avoided and will be impacted by development of the proposed project, all impacts shall be mitigated by the implementing entity at a minimum ratio of 1:1 for occupied habitat area as a component of habitat restoration or through compensatory mitigation. If state listed plants or those listed by the Native Plant protection Act will be impacted by the proposed project, CDFW shall be consulted to determine if take can be avoided. If it is determined through consultation with CDFW that take cannot be avoided, mitigation consistent with that described above would be required under CEQA. Additional levels of mitigation may be required by CDFW under a CESA Incidental Take Permit. If the Monterey County Regional Conservation Investment Strategy (RCIS) is adopted at the time of project implementation, mitigation may be facilitated through the RCIS program. A habitat mitigation and monitoring plan (HMMP) shall be prepared by a qualified biologist and submitted to implementing entity for review and approval. (Note: if a federally and/or state listed plant species will be impacted, USFWS and/or CDFW will likely require a restoration plan to be submitted for their review in support of federal and/or state incidental take authorization[s]). The HMMP shall include, at a minimum, the following components: <ul style="list-style-type: none">▪ Description of the project/impact site (i.e., location, responsible parties, areas to be impacted by habitat type)	If special status plant populations, sensitive natural communities, or waters of the U.S. and/or state cannot be avoided and will be impacted, mitigate impacts at a minimum ratio of 1:1 for occupied habitat area or through compensatory mitigation. contingency compensatory mitigation, funding mechanism)							
BIO-1(d): Conduct Special Status Wildlife Pre-Construction Surveys							
<i>General Wildlife Surveys</i> Pre-construction clearance surveys for northern California legless lizard, coast horned lizard, two-striped garter snake, western pond turtle and American badger shall be conducted within 14 days prior to the start of construction (including staging and mobilization) in areas of suitable habitat. For two-striped garter snake and western pond turtle, these areas are limited to the Canyon Del Rey/SR 218 segment. California legless lizard may be found in undeveloped areas throughout the project corridor. Coast horned lizard and American badger suitable habitats are limited to the Northern Marina, Northern Loop, National Monument Loop, Ryan Ranch, and Canyon Del Rey/SR 218 segments. The surveys shall cover the entire disturbance footprint plus a minimum 200-foot buffer within suitable habitat, where permissible, and shall identify all special status animal species that may occur on-site. Surveys shall be conducted by a qualified biologist with experience with the species, in accordance with current industry standards. Surveys shall include transects walked throughout the project site and shall be conducted during suitable weather conditions and time of day to maximize detection as much as possible. Active burrows or dens shall be avoided to the maximum extent possible, and a non-disturbance buffer of 50 feet shall be implemented where feasible. Smaller avoidance buffers may be established through consultation with CDFW. 					Initial	Date	Comments
avoidance area. If construction would be required within the buffer area, a biological monitor shall be present for all work within the buffer avoidance area to ensure no direct impacts to host plants. If avoidance is not feasible, focused surveys shall be conducted to determine presence or absence of the butterfly species. This may include surveys during the adult flight period (mid-June through early September), and/or inspection of host plants for all life forms (egg, larva, pupa, and adult). If individuals of any life stage that may be impacted by the proposed project are detected during focused surveys, the plant cannot be disturbed without take authorization from USFWS. Only a USFWS permitted biologist would be allowed to relocate occupied host plants.							
<i>California Tiger Salamander</i> Prior to grading and construction in natural areas of all segments containing suitable upland habitat, a qualified biologist shall conduct a preconstruction survey for CTS. The survey shall include a transect survey over the entire project disturbance footprint (including access and staging areas), and mapping of burrows that are potentially suitable for salamander occupancy. During this survey, biologists shall inspect burrows for CTS with an electronic devise (scope) to determine if they are occupied. If any CTS is detected, no work can be conducted until the individual leaves the site of their own accord, unless federal and state “take” authorization has been issued. Typical preconstruction survey procedures, such as burrow scoping and burrow collapse, cannot be conducted without federal and state permits. If any life stage of CTS is found within the survey

					Initial	Date	Comments
area, the USFWS and CDFW shall be consulted to determine the appropriate course of action to comply with the FESA and CESA, if permits are not already in place at the time of construction. Inspection of burrows must be conducted under the direct supervision of a qualified CTS biologist approved by CDFW and/or USFWS if conducted under a state and/or federal incidental take permit. Take of CTS, including disturbance, handling or relocating, is illegal without state and federal take authorization.							
<i>California Red-Legged Frog</i>							
Within 24 hours prior to grading and construction in undeveloped areas of the Ryan Ranch, Canyon Del Rey/SR 218, National Monument Loop, Northern Loop, and Northern Marina segments, a clearance survey for CRLF shall be conducted by a qualified biologist. If suitable aquatic habitat is present in or immediately adjacent to the construction area (suitable aquatic habitat only occurs along the Canyon Del Rey/SR 218 Segment), two-night surveys shall be conducted within 48 hours of the start of work. Night surveys shall follow the Revised Guidance on Site Assessments and Field Surveys for the California Red-legged Frog (USFWS 2005). If a CRLF is detected during the survey, the implementing entity shall consult with the USFWS and CDFW. Project activities shall not occur until the individual has left the site on its own accord. If CRLFs are to be relocated, a formal take authorization issued by the USFWS must be obtained prior to relocation. No CRLFs shall be relocated or handled without express permission from USFWS and shall be conducted by a qualified biologist holding a scientific collecting permit for the species.							

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
<i>Monterey Dusky-footed Woodrat</i> A qualified biologist shall conduct a pre-construction survey for woodrats no more than 14 days prior to construction. Middens within 50 feet of project activity that would not be directly impacted by project activity shall be demarcated with a 50-foot avoidance buffer and left intact. Smaller avoidance buffers may be established in consultation with CDFW. If a midden(s) that cannot be avoided are found during the pre-construction survey, qualified biologist who holds a scientific collecting permit for that species shall dismantle the midden with the goal of ensuring the individuals are allowed to leave the work areas unharmed before on site activities begin.							
<i>Special Status Bats</i> If trees of sufficient size and structure (i.e., mature trees with hollows and crevices) to support roosting bats are slated for removal during construction, a preconstruction bat emergence survey shall be conducted by a qualified biologist to determine if the tree functions as a roost. Emergence times may vary dependent on species, weather conditions, and time of year and shall occur when conditions are favorable (higher temperatures, high humidity, low wind, no precipitation), and timed to capture bat emergence (typically occurring between sunset and sunrise). Maternity season for bats ranges from May 1 through August 31. After September, bats begin to enter their hibernaculum stage in preparation for colder months and may not emerge from their roosts, and emergence surveys would not be conclusive. The specific timelines for implementation of							

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
	management of roosting bats within the project corridor would be determined based upon the results of the emergence surveys. A Bat Eviction Plan shall be prepared and submitted to CDFW for approval prior to bat exclusion. Bats shall only be excluded during the non-breeding season. Once the species has been determined, areas to relocate roosts to may also be identified (i.e. other areas away from tree removal area). Relocation sites away from the project impact area can be enhanced with additional bat boxes or structures depending on the species. Alternative bat roosting habitat shall be installed as far in advance of the humane eviction/exclusion as possible to increase likelihood of their discovery and use by the bats being evicted. Therefore, the installation of alternative bat roosting structures shall be initiated as soon as active roosts are identified. After alternative roost structures have been installed, eviction measures shall be implemented no less than 10 days following installation of alternative bat roosting structures. Install exclusion netting and socks (specific for bats to prevent re-entry) at roost openings to allow bats to exit but prevent their re-entry into the roost. Nets and socks would have to be regularly checked to prevent wildlife entrapment. Exclusion devices shall be left in place and monitored daily for seven days to confirm the exclusion is successful prior to tree removal. Tree removal shall be monitored by a qualified bat biologist in case any further individual relocation is necessary. If maternal colonies, or active bat roosts adjacent to the work area that may be disturbed by construction, are identified, a 50-foot non-disturbance buffer shall be required. No work shall occur in this area until a qualified bat

biologist has determined the site is no longer used or young are independent.							
<i>Reporting</i>							
A report of all pre-construction survey results shall be submitted to the implementing entity for its review prior to the start of demolition. The report shall include a description of the survey methodology for each species, the environmental conditions at the time of the survey(s), the results of the survey, any requirements for addressing special status species identified during surveys, and the biological qualifications of the surveyors. The report shall be accompanied by maps and figures showing the location of any special status species occurrences and associated avoidance buffers.							
BIO-1(e): Conduct Nesting Bird Preconstruction Surveys							
Ground disturbance and vegetation removal activities shall be restricted to the non-breeding season (September 16 to January 31) for all segments when feasible. For ground disturbance and vegetation removal activities occurring in all project areas during the bird nesting season (February 1 to September 15), general pre-construction nesting bird surveys shall be conducted by a qualified biologist for all migratory birds, including special status birds and raptors (i.e., northern harrier, Cooper’s hawk, horned lark, tricolored blackbird and white-tailed kite) not more than 10 days prior to construction activities involving ground clearing, vegetation removal/trimming, or building demolition. The surveys shall include the disturbance area plus a 200-foot buffer around the site if feasible, a 500-foot buffer for tricolored blackbird, and a minimum of 500-feet	When feasible, conduct ground disturbing activities and vegetation removal during the non-breeding season for nesting birds; for ground disturbance and vegetation removal occurring during the bird nesting season, conduct general pre-construction nesting bird surveys, including subsequent reassessments, buffer implementation, and CDFW consultation, as required	Not more than 10 days prior to construction activity commencing during the breeding season	Once prior to start of construction, with additional surveys in areas where no construction activity has occurred for 10 or more days	Implementing entity and qualified biologist			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
	for white-tailed kite as determined by a qualified biologist. If active nests are located, an appropriate avoidance buffer shall be established within which no work activity will be allowed which would impact these nests. The avoidance buffer would be established by the qualified biologist on a case-by-case basis based on the species and site conditions. The qualified biologist shall observe nesting birds for baseline behavior prior to the start of work. If this buffer is not feasible, a reduced buffer may be implemented, and a qualified biologist shall monitor the nest for disturbance. If nesting bird show signs of disturbance, all work shall stop and the original (or larger) buffer shall be established. In no cases shall the buffer be smaller than 50 feet for non-raptor bird species, 200 feet for raptor species, a 300-foot buffer for tricolored blackbird (nest or colonies), and a minimum of 500 feet for white-tailed kite. Larger buffers may be required depending upon the status of the nest and the construction activities occurring in the vicinity of the nest. If fully protected White-tailed kites are documented nesting within 500 feet of construction activities, a minimum 500-foot non-disturbance buffer shall be implemented, and a biological monitor shall be present during work within one mile of the nest. If a 500-foot buffer is not feasible, CDFW shall be consulted on appropriate avoidance and minimization methods, which would likely include work restrictions within 0.5 mile of the nest, biological monitoring for activity within the nest’ line-of-sight, etc. The buffer area(s) shall be closed to all construction personnel and equipment until juveniles have fledged and the nest is inactive. The implementing entity-approved biologist shall confirm that breeding/nesting is completed						

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
and young have fledged the nest prior to removal of the buffer. Tricolored blackbird colonies shall be reassessed after 10 days of discovery to accurately determine colony size. The buffer shall remain in place until the end of the nesting season or until the qualified biologist has determine all young have fledge and are no longer dependent on the colony. If a 300-foot buffer is not feasible, CDFW shall be consulted on appropriate avoidance and minimization method, which would likely include work restrictions within 300 feet of the colony, biological monitoring for activity within the nest’s line-of-sight, etc.							
BIO-1(f): Implement Biological Resources Avoidance and Minimization							
The following measures shall be applied to all segments to avoid impacts to sensitive species and biological resources. The implementing entity shall be responsible for implementing selected measures. <ul style="list-style-type: none">Ground disturbance shall be limited to the minimum necessary to complete the project. The limits of disturbance for each construction phase shall be flagged. Areas of special biological concern within or adjacent to the limits of disturbance shall have highly visible orange construction fencing installed between said area and the limits of disturbance.All construction occurring within or adjacent to natural habitats that may support Federally and/or State listed endangered/threatened species, State fully protected species, and/or special status species shall have a qualified biological monitor present during all initial ground disturbing/vegetation clearing activities.	Implement biological resources avoidance and minimization measures for all segments	During construction	Ongoing during construction	Implementing entity and qualified biologists			
	Conduct biological monitoring for all initial ground disturbance activity	During construction	Ongoing as-needed for duration of construction	Qualified biologist			
	Oversee and monitor biological resources mitigation compliance	During construction	Ongoing throughout construction phase	Implementing entity and qualified biologists			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
<ul style="list-style-type: none"> No endangered/threatened species shall be captured/handled, relocated, harmed, or harassed without express written permission from the CDFW and/or USFWS. If at any time during construction an endangered, threatened, or fully protected species enters the construction site or otherwise may be impacted, all construction activities shall cease. A CDFW/USFWS-approved biologist shall document the occurrence and consult with the CDFW and USFWS, as appropriate, to determine whether it was safe for project activities to resume. At the end of each workday, excavations shall be secured with cover or a ramp provided to prevent wildlife entrapment. All trenches, pipes, culverts or similar structures shall be inspected for animals prior to burying, capping, moving, or filling. If night work is required, all construction lighting shall be pointed down and directed only on the work area. The implementing entity shall approve one or more qualified biologists to oversee and monitor biological compliance for the project. At least one qualified biologist shall be present during all initial ground disturbing activities, including vegetation removal to recover special status animal species unearthed by construction activities.

BIO-1(g): Implement California Tiger Salamander Compensatory Mitigation							
If California tiger salamander habitat cannot be avoided, the implementing entity shall preserve off-site suitable upland habitat and/or purchase credits at an approved conservation bank as compensatory mitigation to offset impacts to suitable California tiger salamander upland habitat. The compensatory mitigation shall incorporate the conditions and compensatory mitigation requirements specified in the incidental take permit(s) and/or incidental take statement that could be issued by CDFW and USFWS for this project but shall meet the minimum standards specified in this measure. Compensatory mitigation shall be provided at a ratio of not less than 0.5:1 (area mitigated: area impacted) for Categories 3 and 4 upland habitat and 1:1 for Categories 1 and 2 habitat. Compensatory mitigation shall occur off-site. Areas proposed for preservation must contain verified California tiger salamander habitat within 1.3 miles of a known breeding pond. The compensatory mitigation area(s) shall have a restrictive covenant (e.g., conservation easement) prohibiting future development/disturbance and shall be managed in perpetuity to encourage persistence and enhancement of the preserved target species. Compensatory mitigation lands cannot be located on land that is currently held publicly for resource protection, unless a portion of such land is degraded/destroyed or otherwise not functioning as pre-disturbance, intact natural habitat (e.g., abandoned agricultural field) and could be restored. The compensatory mitigation areas shall be managed by a conservation lands management entity or other qualified easement holder.	If California tiger salamander habitat cannot be avoided, preserve off-site habitat or purchase conservation credits	Prior to operation	Once per affected habitat area	Implementing entity in coordination with CDFW			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
The CDFW and organizations approved by CDFW that meet the criteria below may be considered qualified easement holders for those species for which the CDFW has regulatory authority. To qualify as a “qualified easement holder” a private land trust must at a minimum have: 1. Substantial experience managing conservation easements that are created to meet mitigation requirements for impacts to special-status species; 2. Adopted the Land Trust Alliance’s Standards and Practices; and 3. A stewardship endowment fund to pay for its perpetual stewardship obligations. Other specific conditions for qualified easement holders may be outlined in incidental take permit(s) and/or incidental take statement that could be issued by CDFW and USFWS for this project. The implementing entity shall determine whether a proposed easement holder meets these requirements. The implementing entity shall also be responsible for donating to the conservation easement holder fees sufficient to cover administrative costs incurred in the creation of the conservation easement (appraisal, documenting baseline conditions, etc.) and funds in the form of a non-wasting endowment to cover the cost of monitoring and enforcing the terms of the conservation easement in perpetuity. The amount of these administrative and stewardship fees shall be determined by the conservation easement holder in consultation with the implementing entity. Conservation easement(s) shall be held in perpetuity by a qualified easement holder (as defined above), and be subject to a legally							

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
<p>binding agreement that shall: (1) be recorded with the County Recorder(s); and (2) contain a succession clause for a qualified easement holder if the original holder is dissolved.</p> <p>The following factors shall be considered in assessing the quality of potential mitigation habitat: (1) current land use, (2) location (e.g., habitat corridor, part of a large block of existing habitat, adjacency to source populations, proximity to potential sources of disturbance), (3) vegetation composition and structure, (4) slope, (5) soil composition and drainage, and (6) level of occupancy or use by all relevant species.</p> <p>To meet the requirement that the mitigation habitat is of value equal to, or greater than, the habitat impacted on the project site, the mitigation habitat must be either “suitable habitat” or “enhanced habitat” as described below:</p> <p><i>Suitable Habitat</i></p> <p>To meet the requirements for suitable habitat that provides equal or greater habitat value for listed animal species than the impacted habitat, the habitat must:</p> <ol style="list-style-type: none"> 1. Provide habitat for special status animal species, such that special status animal species populations can regenerate naturally when disturbances are removed; 2. Not be characterized by (or adjacent to areas characterized by) high densities of invasive species, such as yellow star-thistle, or species that might jeopardize habitat recovery and restoration; 3. Not contain hazardous wastes that cannot be removed to the extent that the site could not provide suitable habitat; and 4. Not be located on land that is currently publicly held for resource protection. 							

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
<i>Enhanced Habitat</i>							
If suitable habitat is unavailable, or in lieu of acquiring already suitable special status animal species habitat, the applicant may enhance potential habitat that:							
1. Is within an area with potential to contribute to habitat connectivity and build linkages between populations;							
2. Consists of actively farmed land or other land containing degraded habitat that will support enhancement;							
3. Supports suitable soils, slope, and drainage patterns consistent with special status animal species requirements;							
4. Cannot be located on land that is currently held publicly for resource protection; and							
5. Does not contain hazardous wastes or structures that cannot be removed to the extent that the site could not provide suitable habitat.							
<i>Enhanced Habitat Standards</i>							
For enhanced habitat conditions to equal or exceed habitat conditions on the project site, the enhanced habitat shall meet the following habitat criteria: After five years, these sites must consist of suitable habitat or contain other habitat characteristics (e.g., small mammal burrows in upland habitat for California tiger salamander habitat , wetlands, ponds, etc.) that are consistent with the known ecology of the special status animal species to which compensatory mitigation is being applied and the habitat components for which the mitigation is compensating for.

					Initial	Date	Comments
	similar habitat or through the in-lieu funding of such through an existing mitigation bank. If the RCIS is adopted at the time of project implementation, mitigation may be facilitated through the RCIS program. Funding and management of internal mitigation areas can be managed internally. Funding and management of off-site mitigation lands shall be provided through purchase of credits from an existing, approved mitigation bank or land purchased by implementing entity and placed into a conservation easement or other covenant restricting development (e.g., deed restriction). Internal mitigation lands, or in lieu funding sufficient to acquire lands shall provide habitat at a 1:1 ratio for impacted lands, comparable to habitat to be impacted by individual project activity. Compensatory mitigation for sensitive vegetation communities can be combined with other compensatory mitigation (e.g., sensitive vegetation communities) as applicable.						
	<i>Restoration and Monitoring</i> If waters and/or wetlands cannot be avoided and will be impacted by construction of the Trail, a compensatory mitigation program shall be implemented in accordance with <i>Mitigation Measure BIO-1(c)</i> and the measures set forth by the regulatory agencies during the permitting process. All temporary impacts to waters and wetlands shall be fully restored to natural condition.

Cultural Resources							
CUL-2: Conduct Archaeological Monitoring during Construction							
<p>Prior to the commencement of construction activities, an orientation meeting shall be conducted by an archaeologist with the general contractor, subcontractor, and construction workers associated with earth disturbing activities for all Trail segments. The orientation meeting shall describe the potential of exposing archaeological resources, the types of cultural materials may be encountered, and directions on the steps that shall be taken if such a find is encountered. Topics to be discussed shall include, but not be limited to, Ohlone material culture and a brief history of the Former Fort Ord.</p> <p>During construction, a qualified archaeologist shall be present during all earth moving activities involving excavation for all Trail segments. If previously unknown or undiscovered archaeological resources are encountered during ground-disturbing construction activities, the archaeological monitor shall have the authority to halt work, and the implementing agency shall be notified at once. The qualified archaeologist shall assess the nature, extent, and potential significance of any archaeological remains. The implementing agency shall implement a Phase II subsurface testing program to determine the resource boundaries in the trail corridor/impact area, assess the integrity of the resource, and evaluate the site’s significance through a study of its features and artifacts.</p> <p>If the site is determined to be significant, the implementing agency may choose to cap the resource area, using culturally sterile and</p>	Conduct orientation meeting addressing cultural resources	Prior to initiation of construction activities for each segment	As needed during construction (may be repeated to ensure all construction personnel review WEAP training prior to any site work)	Implementing entity and archaeologist			
	Conduct archaeological monitoring	During excavation during construction phase	Ongoing during construction involving excavation	Implementing entity and archaeologist			
	Conduct capping of previously unknown or undiscovered archaeological sites, and other response measures to discoveries, as needed	During construction	As needed during construction	Implementing entity and archaeologist

	chemically neutral fill material, and shall include open space preservation and environmentally sensitive area signage for the site to ensure its protection from development. A qualified archaeologist shall be retained to monitor the placement of fill upon the site and to make open space preservation and interpretive recommendations. If a significant site will not be capped, the results and recommendations of the Phase II study shall determine the need for a Phase III data recovery program designed to record and remove significant archaeological materials that could otherwise be tampered with. Phase III data recoveries typically include extensive subsurface excavation and a full analysis of additional background research, the publication of scholarly work, and preparation of interpretive materials designed to exhaust the data potential of an archaeological site, in accordance with the Secretary of the Interior’s Standards for the Treatment of Historic Properties (National Park Service 2017). If the site is determined insignificant, no capping and/or further archaeological investigation shall be required.

GEO-5: Implement Paleontological Resources Mitigation							
The following mitigation measures shall only be implemented during ground construction activities (i.e., grading, trenching, foundation work, digging footings, and other excavations) where ground disturbance exceeds ten feet below ground surface within the project corridor, including development of proposed overcrossings and undercrossings in the Northern Loop, Canyon Del Rey/SR 218, and CSUMB Loop North segments and development of the raised pathway as part of the Canyon Del Rey/SR 218 segment. <i>Develop a Paleontological Resources Mitigation Plan</i> Prior to the commencement of ground disturbing activities for overcrossings and undercrossings in the Northern Loop, Canyon Del Rey/SR 218, and CSUMB Loop North segments, and the raised pathway in the Canyon Del Rey/SR 218 segment a qualified professional paleontologist shall be retained to prepare and implement a Paleontological Resources Mitigation Plan (PRMP) for the project. A Qualified Paleontologist is an individual who meets the education and professional experience standards as set forth by the SVP (2010), which recommends the paleontologist shall have at least a Master’s Degree or equivalent work experience in paleontology, shall have knowledge of the local paleontology, and shall be familiar with paleontological procedures and techniques. The PRMP shall describe mitigation recommendations in detail, including paleontological monitoring procedures; communication protocols to be followed in the event that an unanticipated	Develop a paleontological resources mitigation plan for areas where ground disturbance will exceed ten feet below ground surface.	Prior to commencement of ground disturbing activities exceeding ten feet below ground surface	Once	Implementing entity and qualified paleontologist			
	Conduct paleontological WEAP program	As needed during construction (may be repeated to ensure all construction personnel review WEAP training prior to any site work)	Once for each construction group working in areas where ground disturbance would exceed ten feet below ground surface	Implementing entity and qualified paleontologist			
	Conduct paleontological monitoring	During excavation and grading with a depth of 10 or more feet	As needed during construction phase	Implementing entity and qualified paleontologist			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
fossil discovery is made during project development; and preparation, curation, and reporting requirements.							
<i>Paleontological Worker Environmental Awareness Program (WEAP)</i>							
Prior to the start of construction for all segments, the Qualified Paleontologist or his or her designee, shall conduct training for construction personnel regarding the appearance of fossils and the procedures for notifying paleontological staff should fossils be discovered by construction staff. The WEAP shall be fulfilled at the time of a preconstruction meeting. In the event a fossil is discovered by construction personnel anywhere in the project area, all work in the immediate vicinity of the find shall cease and a qualified paleontologist shall be contacted to evaluate the find before re-starting work in the area. If it is determined that the fossil(s) is (are) scientifically significant, the qualified paleontologist shall complete the mitigation outlined below to mitigate impacts to significant fossil resources.							
<i>Paleontological Monitoring</i>							
Initially, full-time monitoring shall be conducted during ground construction activities where ground disturbance exceeds ten feet below ground surface within deposits of Older Quaternary dune sand (Qod) and Aromas Sand (Qae). Monitoring shall be conducted by a qualified paleontological monitor, who is defined as an individual who meets the minimum qualifications per standards set forth by the SVP (2010), which includes a B.S. or B.A. degree in geology or paleontology with one year of monitoring experience and knowledge of collection and salvage of paleontological							

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
	resources. The duration and timing of the monitoring shall be determined by the Qualified Paleontologist and the location and extent of proposed ground disturbance. If the Qualified Paleontologist determines that full-time monitoring is no longer warranted, based on the specific geologic conditions at the surface or at depth, the Qualified Paleontologist may recommend that monitoring be reduced to periodic spot-checking or cease entirely.						
	<i>Fossil Discovery, Preparation, and Curation</i> If a paleontological resource is discovered, the monitor shall have the authority to temporarily divert the construction equipment around the find until it is assessed for scientific significance and collected. Typically, fossils can be safely salvaged quickly by a single paleontologist and not disrupt construction activity. In some cases, larger fossils (such as complete skeletons or large mammals) require more extensive excavation and longer salvage periods. In this case, the paleontologist should have the authority to temporarily direct, divert or halt construction activity to ensure that the fossil(s) can be removed in a safe and timely manner. Once salvaged, significant fossils shall be identified to the lowest possible taxonomic level, prepared to a curation-ready condition and curated in a scientific institution with a permanent paleontological collection (such as the UCMP) along with all pertinent field notes, photos, data, and maps. The cost of curation is assessed by the repository and is the responsibility of the project owner.						
	<i>Final Paleontological Mitigation Report</i> At the conclusion of laboratory work and museum curation, a final report shall be						

Transportation Agency for Monterey County
Fort Ord Regional Trail and Greenway

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
prepared describing the results of the paleontological mitigation monitoring efforts associated with the project. The report shall include a summary of the field and laboratory methods, an overview of the project geology and paleontology, a list of taxa recovered (if any), an analysis of fossils recovered (if any) and their scientific significance, and recommendations. The final report shall be submitted to the implementing entity. If the monitoring efforts produced fossils, then a copy of the report shall also be submitted to the designated museum repository.							
Hazards and Hazardous Materials							
HAZ-3(a): Conduct Soil Sampling and Implement Necessary Remediation							
This mitigation measure applies to all segments of the Trail within the vicinity of former Fort Ord firing ranges, including the Fort Ord OU1 (off-site plum) area, in the vicinity of existing and former railroad tracks, in the vicinity of major roads and highways, in current and former agricultural areas, and in the vicinity of the following roadways: Beach Road, Del Monte Boulevard, Charles Benson Road (Northern Marina segment), Reservation Road, Inter-Garrison Road, Blanco Road (Northern Loop segment), 8 th Street, California Drive, Imjin Parkway, Imjin Road, Engineering Equipment Road (CSUMB Loop North segment), Divarty Street (CSUMB Loop South segment), General Jim Moore Boulevard, 8 th Avenue, Parker Flats Cut Off Road (National Monument Loop segment), Del Monte Avenue, Highway 218, General Jim Moore Boulevard (Canyon Del Rey/SR 218 Segment) and South Boundary Road (Ryan Ranch segment). In these areas, prior to	Conduct a Supplemental Soils Investigation	Prior to construction	Once per segment, where required	Implementing entity			
	Develop and implement remediation or management of known contaminated soil	Prepare plan prior to issuance of grading permits, implement during construction	Once; implement as needed during construction	Implementing entity, Monterey County Environmental Health Bureau, and construction contractor			
	Prepare a report that includes findings of the assessment and any recommendations	Prepare plan prior to issuance of grading permits, implement during construction	Once; implement as needed during construction	Implementing entity			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification

	<p>project construction, implementing entities shall conduct a Supplemental Soils Investigation. The Soil Sample Investigation shall include soil sampling at selected locations along the Northern Marina, Northern Loop, CSUMB Loop North, CSUMB Loop South, National Monument Loop, Canyon Del Rey/SR 218, and Ryan Ranch segments under the supervision of a professional geologist or professional civil engineer. Soil samples shall identify the concentrations of anticipated contaminants which may include, but are not limited to: VOCs, PFAS, aerial-deposited lead, organochlorine pesticides, polycyclic aromatic hydrocarbons, total petroleum hydrocarbons, volatile organic compounds, semi-volatile organic compounds and arsenic.</p> <p>The implementing entity shall coordinate with the Monterey County’s Environmental Health Bureau to develop and implement a program to remediate or manage known contaminated soil during construction. If necessary, any additional information gathered from the Supplemental Soil Investigation shall be used to identify locations along the project corridor that may require remedial action in order to prevent exposure of construction workers, maintenance personnel, and Trail users to these contaminants. The environmental data collected shall also be used to identify the appropriate disposal options for those soils or demolished materials that require off-site disposal.</p> <p>Disposal shall occur at an appropriate facility licensed to handle such contaminants and remedial excavation shall proceed under the supervision of an environmental consultant licensed to oversee such remediation. Where possible, potentially contaminated soils shall be</p>

stockpiled and characterized to determine the appropriate means and location for proper disposal. The remediation/disposal program shall be approved by the Monterey County Environmental Health Bureau. The implementing entity shall submit any required correspondence to Monterey County Environmental Health Bureau prior to issuance of grading permits. All proper waste handling and disposal procedures shall be followed in accordance with applicable DTSC and CalOSHA regulations. Upon completion of the Supplemental Site Investigation, the implementing entity shall prepare a report presenting the findings of the additional assessment. The report shall include figures depicting the boring locations, summary tables of analytical data, conclusions, and recommendations.							
HAZ-3(b): Prepare and Implement Soils Management Plan							
The implementing entity shall ensure a Soils Management Plan (SMP) is developed by a qualified engineer or geologist and implemented in order to protect workers during ground-disturbing activities and to remove and/or mitigate exposure to hazardous-material-containing soil, where present in the Trail corridor as determined by the Supplemental Soils Investigation as described under <i>Mitigation Measure HAZ-3(a)</i> . Laboratory data for the impacted soil, identified as part of the Supplemental Soils Investigation prepared under <i>Mitigation Measure HAZ-3(a)</i> , shall be used to profile excavated soil prior to transport, treatment, and recycling at a licensed treatment facility. Additional profiling of the export soils shall be	Develop an SMP for portions of the Trail corridor identified by the Supplemental Soils Investigation under Mitigation Measure HAZ-3(a)	Prior to approval of grading permits	Once	Implementing entity and qualified engineer or geologist			
	Implement SMP where applicable	During construction ground disturbance	As needed during ground disturbance	Implementing entity

					Initial	Date	Comments
performed as needed to satisfy requirements of the receiving facility. Removal, transportation, and disposal of impacted soil shall be performed in accordance with applicable DTSC and CalOSHA I laws, regulations, and ordinances. The SMP shall include health and safety information for workers and the general public with an emphasis on potential adverse health effects and how to seek proper help if an accident is suspected and inform the various contractors and workers of the presence of shallow soil impacted with contaminants and the appropriate measures to avoid exposure to contaminants. These measures may include, but would not be limited to, the following:							
	1. Installing temporary security fencing around the construction site and flag/cone off the areas of contaminated soils (Hot Spots) until the contaminants are removed						
	2. Providing all personnel entering a Hot Spot with site-specific awareness training						
	3. Requiring that all personnel whose work will involve the excavation or disturbance of soils in and around the Hot Spot must have successfully completed 40-hour Hazardous Worker (HAZWOPER) training						
	4. Requiring a HAZWOPER supervisor to be on-site at all times during the excavation or disturbance of soils in a Hot Spot						
	5. Prohibiting personnel who cannot prove that they are authorized to enter a Hot Spot or do not have the appropriate personal protective equipment from entering a Hot Spot						
	6. Prohibiting eating, drinking, smoking, chewing gum or tobacco in Hot Spots, and requiring consumable items and activities be confined to designated worker break						

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Monitoring Frequency	Responsible Agency	Compliance Verification		
					Initial	Date	Comments
areas							
In the event that contaminated soil and/or groundwater are identified where not previously anticipated during construction, the SMP shall also require that construction cease, and that appropriate handling and disposal procedures be implemented. Contaminated soils and/or groundwater can be identified by discoloration or stains, distinctive odors, absence of plants and animals, subsequent erosion from the absence of plant life, or the presence of paint chips or other materials known to contaminate soils. Procedures for properly handling, storing, and disposing contaminated soils may include, but are not limited to, the following:							
1. Placing contaminated soils in properly labeled drums or lined hazardous waste storage/transportation conveyance units (i.e., roll-off waste boxes) in preparation of transportation and disposal							
2. Avoiding temporary stockpiling of contaminated soils or hazardous materials							
3. If temporary stockpiling is necessary:							
▪ Covering the stockpile with plastic sheeting or tarps							
▪ Installing a berm around the stockpile to prevent runoff from leaving the area							
▪ Avoiding stockpiling in or near storm drains or watercourses							
4. Monitoring the air quality during excavation operations at locations potentially exhibiting elevated concentrations of hazardous material							
5. Collecting water from decontamination procedures and treating and/or disposing of it at an appropriate disposal site							
6. Collecting non-reusable protective

equipment and disposing at an appropriate disposal site							
HAZ-3(c): Records Search for Residual Soil and Groundwater Contamination							
Prior to project construction on the Canyon Del Rey/SR 218 segment a records search for residual soil and groundwater contamination related to the Del Rey Car Wash, Inc. at 810 Canyon Del Rey Road and upgradient release site at 1083 Freemont Boulevard shall be conducted by the implementing entity. Results of the records search shall be documented in a technical memorandum and submitted to the Monterey County Environmental Health Bureau prior to issuance of grading permits for the Canyon Del Rey/SR 18 segment near the listed properties. The technical memorandum shall recommend remediation, such as safety precautions for construction workers if necessary, that shall be implemented prior to Trail construction.	Conduct a records search for residual soil and groundwater contamination related to the Del Rey Car Wash.	Prior to construction of this segment	Once	Implementing entity			
	Prepare a technical memorandum regarding the results of the records search, and implement the recommendations in the memorandum	Ongoing during construction	Prepare report once during construction planning phase; implement recommendations on an ongoing basis throughout construction phase	Implementing entity and Monterey County Environmental Health Bureau			
HAZ-4: Install Airport Noticing and Fencing Prior to Operation							
Prior to the Northern Marina or Northern Loop segments opening for public use, the implementing entity shall post airport disclosure notices regarding ongoing airport operation and safety risks. Notices shall be posted at least every mile on the Northern Marina and Northern Loop segments beginning at least a half mile before entering a Marina Municipal Airport designated safety zone. The location of the notices posted along the Trail shall be identified by the implementing entity in consultation with the Marina Municipal Airport Advisory Committee. The implementing entity shall be responsible for ensuring the signage is properly maintained and shall replace signage	Post airport disclosure notices along the Northern Marina and Northern Loop segments	Prior to opening the Northern Marina or Northern Loop segments for public use	Once	Implementing entity

Noise							
N-1: Implement Noise-Reducing Measures for Pile Driving or Drilling Activities							
Pile driving or drilling activities shall not be permitted at night. During all pile driving or drilling activities, which are a possibility for construction of overcrossings in the Northern Loop and CSUMB Loop North segments and for construction of the raised pathway in the Canyon Del Rey/SR 218 segment, the construction contractor shall employ a combination of the following noise-reducing measures to the extent necessary to reduce noise levels to 85 dBA or below at 50 feet from the project site. Noise monitoring shall occur once daily during normal pile driving or drilling activities to confirm that the standard has been met. If the noise level exceeds 85 dBA, the monitor shall notify the construction contractor, who shall cease pile driving or drilling until additional measures are implemented to reduce noise levels to 85 dBA, with subsequent monitoring. 1. Equipment with the potential to exceed 85 dBA at 50 feet shall be located as far from nearby noise-sensitive receptors as possible. 2. Any construction equipment that would be required during pile driving or drilling activity shall be properly maintained and have manufacturer-approved or recommended sound abatement means on air intakes, combustion exhausts, heat dissipation vents, and the interior surfaces of engine hoods and power train enclosures. 3. If feasible and determined to be an effective option, install temporary noise barriers around the perimeter of pile driving or drilling equipment operation to minimize	Implement noise monitoring and reduction measures as specified in the measure	During construction	Ongoing during construction	Implementing entity and construction contractor			
	Provide written notification to nearby residences regarding pile driving and drilling activities	At least three weeks prior to pile driving or drilling activities	As needed during construction	Implementing entity and construction contractor

construction noise. In addition to these noise-reducing measures, the construction contractor shall provide written notification to residences within 700 feet of pile driving or drilling activities at least three weeks prior to all pile driving or drilling activities. The notification shall inform residents of the estimated start date, times and duration of pile driving or drilling activities.							
Public Safety and Services							
PS-1: Ensure Adequate Police Monitoring and Safety Provisions for Each Portion of the FORTAG Alignment							
Prior to the construction and operation of any segment or portion of FORTAG, the project Master Agreement will be developed and signed by relevant jurisdictional parties, which will include provisions requiring the entry into Supplemental Agreements at the time that actual design and construction occurs. These Supplemental Agreements shall specify: 1) maintenance activities and frequency, including trash collection; 2) safety features or provisions (e.g., lighting, fencing, signage) determined appropriate by local law enforcement in consideration of potential for homeless/transient activity, illegal camping, or criminal activity in the particular trail segment; 3) safety patrol responsibility, frequency, and reporting procedures; 4) protocol for illegal camping and loitering; and 5) monitoring and reporting methodology and frequency, in consideration of ongoing reports to local jurisdictions responsible for maintenance, law enforcement and monitoring. The Supplemental Agreements shall also identify adaptive management options if public safety and law enforcement are determined to be an ongoing issue.	In the Supplemental Agreements to the Master Agreement, include provisions to ensure maintenance, safety, rule enforcement, and police service for the trail. Tribal Cultural Resources							
TCR-1: Native American Monitoring							
A Native American monitor shall be retained and remain present during ground disturbing activities for each Trail segment within previously undisturbed native soils, including any archaeological excavation resulting from the implementation of <i>Mitigation Measure CUL-2</i> in Section 4.5, Cultural Resources . In the event that cultural resources of Native American origin are identified during construction, the implementing entity shall consult with a qualified archaeologist and begin or continue Native American consultation procedures. If the implementing entity, in consultation with local Native Americans, determines that the resource is a tribal cultural resource and thus significant under CEQA, a mitigation plan shall be prepared and implemented in accordance with state guidelines and in consultation with Native American groups. The mitigation plan may include, but would not be limited to: avoidance, capping in place, excavation and removal of the resource, interpretive displays, sensitive area signage, or other mutually agreed upon measures.	Conduct tribal cultural resources monitoring, as described in the measure.	During construction	As needed during construction	Implementing entity and Native American monitor			
	If cultural resources of Native American origin are identified, consult with archaeologist and Native American monitor, and address the discovery as described in the measure.	During construction	As needed during construction	Implementing entity and Native American monitor
